Research and scholarly activity are fundamental to the role of the faculty and essential to the attainment of the University’s goals of academic excellence and national prominence. Research is a crucial part of graduate instruction and has profound effects upon the currency and vitality of undergraduate education. This exploration of the boundaries of knowledge is undertaken by faculty in the various departments and by the research units included in this section.

OFFICE OF RESEARCH AND GRADUATE STUDIES

CENTER FOR COMPUTATION AND TECHNOLOGY

DIRECTOR • Seidel
OFFICE • 302 Johnston Hall
TELEPHONE • 225/578-7877
FAX • 225/578-7876
WEB SITE • www.cct.lsu.edu
E-MAIL • info@cct.lsu.edu

The Center for Computation and Technology was created in response to a funding initiative created by Governor Mike Foster and the Louisiana Legislature to invest in university research and teaching programs as engines of economic development. As stated in Vision 2020, the area of information technology has been selected as one of the six areas of focus by the state of Louisiana.

The center draws on the established areas of expertise at LSU in computer science, computer engineering, and information systems and decision sciences. The center also looks to create new areas of research excellence in order to provide the state and nation with graduates who are equipped to handle the growing technology infrastructure.

LSU HURRICANE CENTER

DIRECTOR • Levitan
OFFICE • 3221 CEBA Building
TELEPHONE • 225/578-4813
FAX • 225/578-7646
WEB SITE • www.hurricane.lsu.edu
E-MAIL • info@hurricane.lsu.edu

The LSU Hurricane Center is an interdisciplinary team of researchers addressing hurricanes and other hazards and their impacts on the natural, built, and human environments. The mission of the Center is to advance the state-of-knowledge of hurricanes and their impacts; to stimulate new interdisciplinary/collaborative research activities; to transfer this knowledge and technology to students and professionals in concerned disciplines; and to assist the state, the nation, and the world in solving hurricane-related problems.

LSU has one of the greatest concentrations of faculty studying hurricanes and their many impacts anywhere in the world. This research expertise covers a very broad spectrum. It includes such areas as remote sensing of storms and their impacts on the environment; real-time monitoring and modeling of hurricane winds, waves, storm surge, and storm surge flooding; hurricane climatology and paleotempestology; wind and flood effects on the coastal environment, buildings, and other infrastructure; transportation and behavioral aspects of evacuations; social support networks and access to services for disaster victims; and many others.

Major research thrusts of the Center at present include: storm surge and rainfall flood modeling and consequence assessment; modeling of travel demand and traffic for hurricane evacuation; hurricane shelter assessment and design; modeling of extreme wind effects on buildings and structures in the LSU Wind Tunnel Laboratory; and application of remote sensing and GIS tools to hazards mapping and monitoring. Integration of multi-disciplinary research findings to develop hurricane hazard mitigation strategies is handled primarily through the Center for the Study of Public Health Impacts of Hurricanes.

The LSU Hurricane Center provides an array of services to state and local governments related to education, mitigation, and emergency preparedness and response. These activities include: delivery of training courses in areas such as geospatial information systems; consequence assessment, and hurricane shelter assessment; development of hurricane exercises; storm surge and rainfall flood studies; and planning studies for shelters and refuges of last resort. When hurricanes threaten Louisiana, faculty and research staff from the LSU Hurricane Center and several collaborating units provide real-time operational support for the Louisiana Office of Homeland Security and Emergency Preparedness, as well as other emergency management agencies. This support includes storm tracking using satellite imagery, meteorological support, storm surge flood modeling, and consequence assessment.

The Center is continuing to develop two unique academic programs to complement its research and service activities. Supported by a large award from the National Science Foundation, the Center and the Department of Civil & Environmental Engineering have created several courses in the field of hurricane engineering. This new discipline covers planning, analysis, design, response, and recovery of civil engineering systems.

Working with the College of Arts & Sciences and several other colleges, the Center has created a new minor in disaster science and management (DSM). DSM is an interdisciplinary minor that provides students interested in emergency management-related careers in the public, nonprofit, and private sectors with:

- a broad understanding of the nature and impact of disasters on the natural, built, and human environments;
- a basis for establishing strategies to effectively plan for disasters, mitigate the adverse effects, respond to disasters, and recover from them. DSM combines traditional emergency management with a strong background in the natural sciences, social sciences, engineering, and information technology. Participating departments/schools include Architecture, Civil & Environmental Engineering,
Environmental Studies, Geography & Anthropology, Landscape Architecture, Oceanography & Coastal Sciences, Social Work, and Sociology.

Center for the Study of Public Health Impacts of Hurricanes

DIRECTOR • van Heerden
OFFICE • 3221 CEBA Building
TELEPHONE • 225/578-4813
FAX • 225/578-7646
WEB SITE • www.publichealth.hurricane.lsu.edu

Established in January 2002, the Center for the Study of Public Health Impacts of Hurricanes is funded through a LSU Hurricane Center initiative to the Louisiana Board of Regents. A five-year contract was awarded through the Board’s Millennium Health Excellence Fund (HEF) to establish the center. A pilot study was funded through the center to research the public health impacts of major flooding and hurricanes in greater New Orleans.

The center includes 16 faculty/researchers from LSU, Baton Rouge; the LSU Health Sciences Center, New Orleans; and the Civil Engineering and Geological Sciences Department, University of Notre Dame. It consolidates the research and expertise of natural scientists, social scientists, engineers, computer specialists, epidemiologists, toxicologists, and the mental health and medical communities to form a broad-based Public Health/Flood Impact Consortium.

The center’s effectiveness and practicality are enhanced by the guidance of an Advisory Panel including members from the Louisiana State Offices of Homeland Security and Emergency Preparedness; Governor’s Office of Coastal Activities; Louisiana Departments of Public Health, Mental Health, and Environmental Quality; LSU Health Sciences Center; and the EBR Parish Animal Control Center. Federal agencies involved include FEMA, EPA, and the CDC.

Various research components of the associated pilot study (of Greater New Orleans) include utilizing computer models for the calculation of storm surges and rainfall flooding, and for the simulation of air and water movement of chemical contaminants; consolidating critical information from government databases; working with Geographic Information System (GIS) technology for the documentation of at-risk areas; and determining probable chemical and sewerage release sites. Epidemiologists, social scientists, and public health experts will determine public and mental health impacts and develop management plans for such scenarios. Federal agencies include the Federal Emergency Management Agency (FEMA), the Environmental Protection Agency (EPA), and the Center for Disease Control (CDC). All aspects of the study are managed through an interactive GIS that will be exportable nationally and internationally.

The center and the New Orleans pilot study will offer a major service to the state of Louisiana. The center will have a direct positive impact on emergency preparedness to prevent or reduce fatalities, disease, pain, and suffering as a consequence of a major disaster. The center will also apply all applicable research results to other areas, such as tornadoes, chemical spills, and terrorism.

The Center funds a number of master’s and Ph.D. students.

CENTER FOR ENERGY STUDIES

EXECUTIVE DIRECTOR • Pulsipher
OFFICE • 1101 Energy, Coast, & Environment Bldg.
TELEPHONE • 225/578-4400
FAX • 225/578-4541

Composed of divisions for Policy Analysis, Data and Information Services, and Research and Development, the Center for Energy Studies (CES) provides analysis, research, information, and technology on energy issues that are important to Louisiana.

Also reporting through the Center’s executive director are a number of independent institutes and programs. These are the Louisiana Applied & Educational Oil Spill Research & Development Program; the Louisiana Governor's Office of Coastal Activities (GOCA), which includes the Basin Research Institute as its Oil & Gas Division; the Minerals Processing Research Institute; and the Radiation Safety Office. Although independent, these units all have either a state legislative or federally mandated mission, an applied resource policy focus, and a strong commitment to public service. Neither the CES nor its associated independent units have academic programs, but they frequently employ graduate assistants and work with staff or faculty from academic units on projects of mutual interest.

The CES, created by the Louisiana Legislature in 1982, is the state’s only officially recognized energy studies center for public higher education. As directed by the Louisiana Board of Regents, the CES is a college-level unit with a strategy to marshal, focus, and support expertise available elsewhere in the University rather than to build a large internal staff.

The structure and staff of the CES have changed since its creation, but its mission has not. The CES conducts, encourages, and facilitates energy-related research and analysis concerning problems and issues affecting Louisiana’s economy, environment, and citizenry. Whether conducted by its staff or by others it supports, the goal of the CES is to provide a balanced, objective, and timely treatment of issues with potentially important consequences for Louisiana.

The CES is mandated to provide information and analysis that respond to the needs of the Legislature, public agencies, and business and civic groups. CES staff respond to requests from a wide variety of individuals and institutions for specialized energy information.

The center is also the “Regional Lead Organization” for the Central Gulf Region of the Petroleum Technology Transfer Council (PTTC) – a nonprofit organization founded in 1993. The center’s PTTC programs are funded by the state and the U.S. Department of Energy, and serve as a clearinghouse for the new and improved upstream (exploration and production) technologies for oil and gas operators.

Governor’s Applied Coastal Research & Development Program

ADMINISTRATOR • Davis
OFFICE • 225/578/3481
FAX • 225/578/0403
WEB SITE • www.osradp.lsu.edu

Origins of the Governor’s Applied Coastal Research & Development Program (GACRDP) date back to 1989 with the passage and signing of Act 6 following the second extraordinary session of the Louisiana Legislature. Among its many provisions, Act 6 called for the coordination of applied coastal research. This effort was assigned to the Governor’s Office of Coastal Activities (GOCA).

In 2002 the Committee on the Future of Coastal Louisiana included a strong recommendation to incorporate a more formal role for science within the GOCA. Through an interagency agreement between the GOCA and LSU, the program is housed at LSU and administered by the University’s Center for Energy Studies. Working within the program’s protocols and guidelines, LSU is authorized to provide subcontracts or letter agreements through the GACRDP to Louisiana’s eligible 26 public and private institutions of higher education for a broad array of applied coastal research initiatives.

With the GACRDP, Louisiana established a mechanism whereby the state’s public and private colleges and universities can apply for research support through a pre-proposal and proposal process. An Advisory Panel sets the research agenda and a Proposal Review Board, recruited from a list of senior coastal researchers, ranks and evaluates all proposals and determines those that will be funded.

Louisiana Applied & Educational Oil Spill Research & Development Program

ADMINISTRATOR • Davis
OFFICE • 225/578/3481
FAX • 225/578/0403
WEB SITE • www.osradp.lsu.edu

Louisiana Applied & Educational Oil Spill Research & Development Program (OSRADP), under the authority of the Louisiana Oil Spill Coordinator, is outlined in R.S. 30:2495 of the Oil Spill Prevention and Response Act (Act 7) that provides funds annually for applied oil spill research.

Through an interagency agreement between the Louisiana Oil Spill Coordinator’s Office and LSU, the program is administered by the University’s Center for Energy Studies. Working within the program’s protocols and guidelines, LSU is authorized to provide subcontracts or letter agreements through the OSRADP to Louisiana’s 19 eligible public institutions of higher education for a broad array of research initiatives.

With the OSRADP, Louisiana has established a mechanism whereby its public colleges and universities can apply for the necessary financial resources to conduct research on oil spill-related matters. Through coordination and cooperation with industry,
government, and the University community, the program’s research mission has promoted the development of tools that are affordable, applied in nature, and designed to guarantee that research is relevant to oil spill-related concerns in Louisiana.

**Louisiana Geological Survey**

**DIRECTOR & STATE GEOLOGIST** • John

**OFFICE** • 3079 Energy, Coast, & Environment Building

**TELEPHONE** • 225/578-5320

**FAX** • 225/578-3662

**WEB SITE** • www.lgs.lsu.edu

Every state in the U.S. has a State Geological Survey. The modern Louisiana Geological Survey (LGS) began operations at LSU in 1931 and was officially established in 1934 by the Louisiana Legislature under state legislative Act 131. The LGS is part of LSU and is administratively under the LSU Center for Energy Studies. The Basin Research Institute (BRI), merged with LGS on July 1, 2000, and is now called the Basin Research Energy Section of the Louisiana Geological Survey. The LGS carries out applied and fundamental geologic research in the areas of Louisiana’s surface and subsurface geology, coastal geology and processes, petroleum geology, environmental geology, mineral resources, and ground water. LGS does statewide geologic mapping, producing maps and reports designed to encourage both economic development and environmental protection. The LGS also studies geologic hazards, landslides, and active faulting, producing maps and reports designed to identify such hazards and to minimize their impacts. Earth science educational materials are provided to school teachers when requested. The LGS works cooperatively on research grants and contracts with several state and federal agencies including the Department of Natural Resources, the Department of Transportation & Development, the Office of Emergency Preparedness, the U.S. Geological Survey, and the U.S. Department of Energy. The Basin Research Energy Section of the LGS includes large stratigraphic research laboratories; a computer-ploting laboratory; petrographic laboratories equipped for thin-section preparation and carbonate and siliciclastic studies; and conference rooms and storage space. A separate well-log library, a core storage facility with a work lab equipped with saws, and other core processing and photographic equipment are located nearby on campus. The LGS core repository and well log library are component collections of the Louisiana Museum of Natural History. Access to other laboratory facilities for geochemical, isotope, SEM, EM, XRD, sedimentology, and paleontological analyses are available in the nearby Department of Geology & Geophysics. The LGS has a well-recognized cartography section that produces maps, atlases, illustrations, slides, and exhibits, both in support of LGS research and for other LSU departments and State agencies. The LGS cartography section, well equipped with computer equipment, plotters, and GIS facilities, has produced several official state maps including the official state map of Louisiana.

In performing its applied mission and tasks the LGS is also charged with effectively transferring geological information from the public to the citizens of the state through the production of maps, bulletins, reports, newsletters, sponsored short courses, professional presentations, and publications. The LGS receives and answers a large number of inquiries from the public related to geologic matters, and its publications are available for sale at nominal prices.

**Minerals Processing Research Institute**

**DIRECTOR** • Pike

**OFFICE** • 1139 Energy, Coast, & Environment Building

**TELEPHONE** • 225/578-3428

**FAX** • 225/578-1476

**WEB SITE** • www.mpri.lsu.edu

The Minerals Processing Research Institute, supported by funds from federal and state agencies and private organizations, was established at LSU in 1979. The institute conducts research on minerals processing, related business and legal issues, and environmental matters.

This research is directed at the chief minerals in the state and region, oil and natural gas, sulfur, salt, and lignite. These mineral resources are among Louisiana’s most valuable assets.

**Radiation Safety Office**

**DIRECTOR** • Wang

**OFFICE** • 125 Nuclear Science Building

**TELEPHONE** • 225/578-2743

**FAX** • 225/578-2094

**WEB SITE** • www.radsafety.lsu.edu

Authorization for Louisiana State University and Agricultural & Mechanical College to possess, store, and use sources of radiation is stipulated in a broad-scope Radioactive Material License issued by the Louisiana Department of Environmental Quality, which has vested responsibility from the United States Nuclear Regulatory Commission within the State of Louisiana. The broad-scope license allows the University maximum flexibility in the use of sources of radiation for teaching and research activities through the operation of an internal radiation safety and control program. Administrative authorization from the University is contained in Permanent Memorandum-30 (PM-30). Under the direction and supervision of the Radiation Safety Committee, the Radiation Safety Office is responsible for implementing radiation control policies and ensuring safety practice in order not only to be fully in compliance with the federal and state regulations, but also to assure individual well-being and the integrity of the University.

The radiation protection program is conducted in such a manner so that radiation exposure to faculty, staff, students, the general public, and the environment will be maintained as low as reasonably achievable and that no radiation exposure will be received without societal benefit. This will be accomplished without hindering legitimate research or realistic teaching objectives. Professional health physicists equipped with a full spectrum of state-of-the-art radioanalytical instrumentation as well as high energy irradiation and neutron activation facilities are available for consultation and research development to support a broad range of radiation applications.

**CENTER FOR GEOINFORMATICS**

**DIRECTOR** • Dokka

**OFFICE** • 2nd Floor, Old Plant Stores

**TELEPHONE** • 225/578-4578

**FAX** • 225/578-4502

**WEB SITE** • www.c4g.lsu.edu

**E-MAIL** • rkdokka@c4g.lsu.edu

The Center for Geoinformatics operates and maintains GULFNET, the 3-D positioning infrastructure that defines the National Spatial Reference System in Louisiana. The Center is a national force in expanding and strengthening the university, commercial, and public-sector geospatial communities within the state of Louisiana and the U.S. It provides the advanced geospatial information applications, products, training, and professional expertise that are required to support economic development and environmental stewardship.

**INTELLECTUAL PROPERTY**

**INTERIM DIRECTOR** • Meyer

**OFFICE** • 203 David Boyd Hall

**TELEPHONE** • 225/578-6941

**FAX** • 225/578-4176

**WEB SITE** • www.lsu.edu/intellectual_property

**E-MAIL** • fmeyer@lsu.edu

The objective of LSU’s Office of Intellectual Property (OIP) is to commercialize the University’s intellectual property—new ideas, inventions, and discoveries. This includes obtaining patents and copyrights; seeking licenses and business partners in the U.S. and worldwide to commercialize that technology; and negotiating and licensing LSU’s technologies for the benefit of society, the University, and the inventors.

**INTERCOLLEGE ENVIRONMENTAL COOPERATIVE**

**DIRECTOR** • Dellinger

**OFFICE** • 411 Choppin Hall

**TELEPHONE** • 225/578-9094

**FAX** • 225/578-0276

**WEB SITE** • www.iec.lsu.edu

**E-MAIL** • co-op@lsu.edu

The mission of the Intercollge Environmental Cooperative is to facilitate collaborative relationships that span traditional college and disciplinary boundaries and enhance the research, teaching, and public...
outreach that is necessary to address effectively today’s complex second and third generation environmental stakeholders, decision makers, and research sponsors throughout the state, region, and nation.

The Intercollege Environmental Cooperative provides a platform for multidisciplinary and interdisciplinary collaboration among LSU researchers and their partners, improves communication and exchange of ideas among environmental researchers and educators across traditional departmental and college/school boundaries, and works to establish ties with industrial organizations that can benefit from increased interaction with LSU on environmental issues.

J. BENNETT JOHNSTON, SR., CENTER FOR ADVANCED MICROSTRUCTURES & DEVICES

DIRECTOR • Wefel
OFFICE • 238 Audubon Hall
TELEPHONE • 225/578-6710
FAX • 225/578-4125
WEB SITE • www.camd.lsu.edu
E-MAIL • hormes@lsu.edu

The J. Bennett Johnston, Sr., Center for Advanced Microstructures & Devices (CAMD) was initiated by a grant from the Department of Energy in 1988. At the heart of the center is a 1.5 GeV electron storage ring. This high-energy electron accelerator produces a broad spectral range, from radio waves to X-rays, of very broad and intense electromagnetic radiation, that can be used by researchers for a variety of applications.

Among these are fabrication of extremely small electronic and mechanical devices, using X-ray lithography; spectroscopic investigations of atoms, molecules, solids, and surfaces; and analytical applications for determining the structure and elemental composition of materials.

LIFE COURSE AND AGING CENTER

DIRECTOR • Cherry
OFFICE • 238 Sepia Grant Building
TELEPHONE • 225/578-4099
FAX • 225/578-4125

E-MAIL • pkatle@lsu.edu

By the year 2020, more than 20 percent of the population is expected to reach the age of retirement. With the increase in the number of older adults living in Louisiana, there will be a greater need to ensure the successful aging of the population of our state. The Life Course and Aging Center recognizes that successful aging begins at birth and continues through the rest of our lives. Therefore, its researchers are committed to identifying the keys to successful aging and educating the public about these important issues.

Its mission is to promote collaborative research activities across many fields including the biological, medical, psychological sciences, develop life course and aging education and curriculum, and collaborate with child and senior service organizations throughout the state. Its faculty members represent six colleges and 14 departments and programs at LSU. Areas of research include cognitive processes and aging, early childhood development, education across the lifespan, interpersonal relations across the lifespan, lifespan development and public policy, physical processes and aging, and sociological aspects of aging.

LOUISIANA SPACE CONSORTIUM

DIRECTOR • Wefel
OFFICE • 238 Sepia Grant Building
TELEPHONE • 225/578-6710
FAX • 225/578-4125
WEB SITE • www.laseagrant.org/

The Louisiana Sea Grant College Program (LaSPACE), supported by funds from the National Aeronautics & Space Administration and the Louisiana Board of Regents, is a group of Louisiana institutions of higher education working with the two state educational boards, business/industry, nonprofit organizations, and a local government partner.

The goal of LaSPACE is to enhance space and aerospace related research, technology education, and public awareness throughout the state and to promote mathematics and science education, the training of aerospace professionals, and economic development. This goal is accomplished through competitive awards to researchers, fellowships for graduate students, mentored research assistantships for undergraduates, outreach to K-12 teachers and students, and public awareness events.

LaSPACE is Louisiana's representative to the National Network of Space Grant Consortia, a congressionally mandated federal/state partnership that is administered by NASA. The national network of space grant consortia encompasses every state in the nation plus Puerto Rico and the District of Columbia.

SEA GRANT DEVELOPMENT

EXECUTIVE DIRECTOR • Wilson
OFFICE • 238 Sepia Grant Building
TELEPHONE • 225/578-6710
FAX • 225/578-6331
WEB SITE • www.laseagrant.org/

The Louisiana Sea Grant College Program is part of the National Sea Grant College Program, a congressionally mandated federal/state endeavor that is administered by the National Oceanic & Atmospheric Administration (NOAA) of the U.S. Department of Commerce. The national program network includes 30 lead institutions and consortia, based in coastal and Great Lakes states, involving more than 250 U.S. colleges, universities, laboratories, and private entities in research, training/education, technology transfer, and advisory service activities focused on coastal and marine problems.

LSU’s Office of Sea Grant Development is responsible for administering all activities approved by NOAA for sea grant funding in Louisiana. The mission of the Louisiana program is to provide knowledge, trained personnel, and public awareness needed to wisely and effectively develop and manage coastal and marine areas and resources in a manner that will assure sustainable economic and societal benefits. This goal is pursued by supporting and/or developing selected capabilities in the Louisiana university system, as appropriate, drawing on those in the national program network. The work requires:

• designing and conducting research, technology transfer, extension, and educational activities involving a broad range of natural science, engineering, economic, legal, public policy, and sociological expertise,

• extensive cooperation with pertinent federal, state, business, and citizen groups. Providing a base of fundamental research and bringing the results to the market by enhancing existing businesses and growing new businesses are key program elements.

The Louisiana Sea Grant NOAA-funded core program supports approximately 30 individual projects at several state universities. These projects typically support the work of more than 20 graduate students. There is also an annual, national competition for approximately 30 Sea Grant Marine Policy Fellowships that provide selected graduate students a unique opportunity to spend a year working in host offices of the U.S. Congress, federal agencies, or associations/ institutions located in the Washington, D.C. area. Core program activities are supplemented with projects funded by various federal and state agencies that have mutual goals and interests. Private sector support for the program is exemplified by the John P. Laborde Endowed Chair for Sea Grant Research and Technology Transfer that brings highly qualified scientists to LSU for periods from one semester to two years to work on marine and coastal issues identified as critical to Louisiana.

In 1978, LSU was named a Sea Grant College—the 13th university in the nation to be so designated and the highest classification attainable in the program. This status was reaffirmed by national performance evaluation teams in 1995 and 2001. LSU is presently one of only 25 universities in the U.S. designated as both a land-grant and sea-grant institution.

The Office of Sponsored Programs, an administrative unit of the Office of Research and Graduate Studies, provides advice and support to the LSU community in the acquisition and administration of externally funded projects to further the instruction, research, and public service mission of the University. The office provides institutional endorsement for proposals, negotiates terms and conditions of awards with sponsors, executes agreements on behalf of the institution, prepares and negotiates subawards, serves as point-of-contact for audits of sponsored projects, processes requests for security clearances, and controls all classified documents. The office also conducts seminars and workshops on federal, state, and institutional requirements; proposal development; and project management.
OFFICE OF ACADEMIC AFFAIRS

PROVOST AND VICE CHANCELLOR • Palm OFFICE • 146 Thomas Boyd TELEPHONE • 225/578-8863 FAX • 225/578-7790 WEB SITE • aaweb.lsu.edu E-MAIL • aca001@lsu.edu

COMMUNICATION ACROSS THE CURRICULUM

DIRECTOR • Bridwell-Bowles OFFICE • 1190 Pleasant Hall TELEPHONE • 225/578-7795 FAX • 225/578-6973 WEB SITE • http://cxc.lsu.edu E-MAIL • cxc@lsu.edu

Communication across the Curriculum (CxC), established in 2004 with a generous gift from LSU engineering alumnus Gordon Cain, helps undergraduates become more sophisticated communicators using the written word, speech, visual images, and digital communication.

Through direct work with students, faculty members, departments, and colleges, as well as through its Web site, CxC provides the following to students:

• increased opportunities for building communication skills
• models of outstanding communication, especially by LSU students
• state-of-the-art digital communication, including digital portfolios of student work
• opportunities for leadership and career development
• connections between communication and service-learning
• public recognition of outstanding student communication

Students who complete Communication-Intensive (C-I) courses will receive a special designation for each class on their transcripts. Students who meet high standards in communication in multiple C-I classes and build an exemplary digital portfolio will be recognized at graduation.

CxC provides the following services to faculty:

• workshops on teaching Communication-Intensive (C-I) courses
• summer institutes on building or redesigning C-I courses
• sample syllabi and communication assignments from faculty at LSU and other universities and examples of excellent student projects
• mini-grants and travel for the development of C-I courses
• a venue for publishing research on the intersection of scholarship and the work of CxC
• a speaker series, awards, and other public acknowledgment of communication work in the classroom

A CxC Advisory Council, comprised of members from across the disciplines and administrative offices on campus, has been established by the Provost. The Advisory Council, in consultation with the appropriate committees on campus, has developed criteria for certifying courses as Communication-Intensive (C-I) and for certifying students who meet high standards of communication. Criteria for establishing a C-I course are built around the following components: significant writing, significant speaking, and uses of visual communication and technology for communication. Criteria for meeting high standards of communication will include a student’s examples of writing, speaking, use of communication technology, and visual communication.

INFORMATION TECHNOLOGY SERVICES

CHIEF INFORMATION OFFICER • Voss OFFICE • Frey Computing Services Center TELEPHONE • 225/578-3700 FAX • 225/578-3709

LOUIS: The Louisiana Library Network

EXECUTIVE DIRECTOR/DEPUTY CIO • Boé OFFICE • Frey Computing Services Center TELEPHONE • 225/578-3740 FAX • 225/578-3709

The Louisiana Library Network combines the resources of Louisiana's public and private academic libraries, along with a centralized support staff located on the LSU campus, to produce a dynamic library consortium. The central support staff, commonly referred to as "LOUIS," provides many services to consortium members such as library automation, a union catalog, a digital library, electronic resources, authentication, training, consulting, and hosting related listers and Web sites. Established in 1992 by the Board of Regents, LOUIS has 43 members and receives approximately $3.5 million annually in contracts and membership fees to support consortium members.

Networking, Infrastructure and Research IT Enablement

EXECUTIVE DIRECTOR/DEPUTY CIO - McMahon OFFICE • Frey Computing Services Center TELEPHONE • 225/578-3700 FAX • 225/578-3709

The LSU Office of Networking, Infrastructure, and Research IT Enablement (NIR) is responsible for the campus voice and data networks, high performance computing, back office server support, and a 7 x 24 Network Operations Center (NOC).

Network facilities include extensive fiber and copper infrastructure that support 18,000 data connections, 12,000 telephone ports and a core data network capable of transmitting over 80 Gigabits of data per second. LSU is a member of National Lambda Rail, Internet 2, Louisiana Optical Networking Initiative and has been designated a vBNS Authorized Institution by the National Science Foundation. The Network Operations Center (NOC) provides uninterrupted operational, production control and maintenance services 24 hours a day, 365 days per year. The NOC monitors mainframe services and applications, campus network equipment and services, network traffic, network security systems as well as all elements to the LSU network including the Internet, Internet 2, NLR, LONI and Cox Communications.

The High Performance Computing (HPC) operations include a wide array of administrative as well as the high performance computing platforms with over 6 TF of aggregate capacity. Premiere resources include SuperM Mike, a 1,024 processor Intel architecture beowulf cluster and Pelican, a 112 processor IBM 3950 cluster. Other systems include a 32 processor SGI system, a 64 processor Apple G5 cluster, a 256 processor Intel cluster and a 70 TB high-speed disk system.

Back office server operations provide enterprise level support for Microsoft Windows server platforms including SQL Server, IIS, Exchange and Active Directory in support of Campus wide applications.

University Information Systems

EXECUTIVE DIRECTOR/DEPUTY CIO • Hadden OFFICE • Frey Computing Services Center TELEPHONE • 225/578-3700 FAX • 225/578-3709

University Information Systems (UIS) develops comprehensive management information systems for the University. ESG has developed and installed more than 50 major applications, including telephone registration (REGGIE), degree audit, admissions, payroll, general ledger, and financial aid.

The division is also responsible for Personal Access Web Services (PAWS), a web-based portal available to all students, faculty, and staff. To date, approximately 70,000 individuals have obtained PAWS portals. Each individual’s portal is unique and is customized to reflect the individual’s relationship to the University. Further, each portal dynamically adapts in real-time when this relationship changes. Services accessed through the PAWS portal include enterprise, groupware, and personal applications that meet the specific administrative, academic, and research needs of each PAWS user. Some of the most widely used PAWS applications include: e-mail, registration, degree audit, grade inquiry, financial aid inquiry, library collections, and course tools.

The division includes System Programming; IS Architectures; HR/Financial Applications; Student and Research Applications; and Portals of Business Intelligence.

User Support and Student IT Enablement

INTERIM EXECUTIVE DIRECTOR/ Boé OFFICE • 203 Frey Computing Services Center TELEPHONE • 225/578-3700 FAX • 225/578-1978

User Support and Student IT Enablement (USST) serves as the primary campus interface with IT at LSU. USST provides customer-focused software and technical support and services to LSU students, faculty and staff. USST is committed to quality response to the computing and technical needs of the campus community as well as the enabling of technology to enhance the living, learning, and working environment.
Located prominently across campus, public computing labs provide student access to 450 PCs and multiple networked printers. Through strategic partnerships with constituents like the Centers for Excellence in Learning and Teaching (CELT), USS supports over 350 machines in multimedia and computer classrooms. IT training opportunities for faculty and staff are available through the USS Training Center. The Center provides 50-60 classroom technical training sessions annually on a variety of introductory and advanced topics, in addition to customized training upon request.

Coordinated Help Desk services are available to LSU students, faculty, and staff, to provide first-level assistance for a variety of technology, connectivity, and related support issues. Campus Telephone Information services are provided more than 50 hours per week.

GORDON A. CAIN CENTER FOR SCIENTIFIC, TECHNOLOGICAL, ENGINEERING, AND MATHEMATICAL LITERACY

INTERIM DIRECTOR • Wischusen
OFFICE • 222 Prescott Hall
TELEPHONE • 225/578-6001
FAX • 225/578-4522
WEB SITE • www.cain.lsu.edu

The Cain Center for Scientific, Technological, Engineering, and Mathematical Literacy provides support for Louisiana educators who are working to prepare citizens who are literate in the science, technology, engineering, and mathematics disciplines to support 21st century economic and societal needs. The Center fosters cross-disciplinary collaborations made possible through its joint sponsorship by the Colleges of Arts & Sciences, Basic Sciences, Education, and Engineering.

The goals of the center include:
• providing leadership for interdisciplinary research and development in the teaching and learning of the science, technology, engineering, and mathematics disciplines at all educational levels;
• disseminating research and practice that leads to high student achievement, especially in the science, technology, engineering, and mathematics disciplines;
• creating opportunities for collaboration across disciplines and with K-12 educational practitioners in investigating, developing, and implementing strategies for enhancing teaching and learning in the science, technology, engineering, and mathematics disciplines; and
• influencing policy concerning the teaching and learning of the science, technology, engineering, and mathematics disciplines.

CENTERS FOR EXCELLENCE IN LEARNING AND TEACHING

EXECUTIVE DIRECTOR • Hutchinson
OFFICE • 118 Himes Hall
TELEPHONE • 225/578-1135
FAX • 225/578-5789
WEB SITE • www.cell.lsu.edu

The Centers for Excellence in Learning and Teaching (CELT) provides resources and services to improve institutional effectiveness and student learning. Three CELT units serve the University community: the Center for Faculty Development (CFD), the Center for Electronic Learning (CEL), and the Center for Assessment & Evaluation (CAE).

An Advisory Council consults with the executive director of the CELT to provide guidance in the centers’ activities and serves as a liaison between the faculty and the CELT. Members of the Advisory Council are appointed by the Chancellor and represent each college and school, the LSU Libraries, the Grants, and Teaching Improvement of Instruction Committee, and students.

The Center for Faculty Development fosters an institutional climate of instructional innovation and teaching excellence by providing services, resources, and programs for LSU faculty, graduate teaching assistants, and their colleges and departments. The CFD is committed to teaching and learning principles and initiatives that promote scholarly teaching, recognize and reward classroom assessment and research, and invite peer collaboration and review. To accomplish this, the center:
• sponsors a variety of special topic workshops, seminars, and special events on teaching issues and the scholarship of teaching;
• provides instructional consultations with faculty to examine their teaching;
• provides departmental consultations on the development of teaching improvement programs, graduate teaching assistant training, and peer consultation and mentoring programs;
• provides and seeks funding opportunities for faculty for the purpose of enhancing student learning through innovative teaching;
• assists faculty members in the development of teaching/course portfolios to better assess and evaluate student learning;
• maintains a faculty resource room and disseminates information to departments and faculty on professional development opportunities and on higher education issues and trends;
• sponsors the Teaching in Higher Education (THE) Forum, a national conference on college teaching;
• facilitates the annual Faculty Awards program; and
• coordinates orientation programs for new faculty and teaching assistants.

The Center for Electronic Learning provides opportunities for faculty to enrich student learning through innovative and practical applications of instructional technologies and strategies for the electronic learning environment. Services provided by the CEL include:
• workshops, seminars, and special events to promote development in teaching and learning in both traditional settings and electronic classrooms;
• consultation about appropriate modes of electronic course/program delivery for active learning;
• consultation on the design, acquisition and implementation of hardware and software learning systems into curricula;
• assistance with transitioning course materials to effectively utilize the best practices for electronic delivery of courses;
• production of multimedia materials (including graphics, video, photography, and written materials); and
• technical support for the delivery of courses and professional development programs via videoconferencing, telecourses, or the Internet; and
• development of Web sites and other technology resources to support effective teaching and learning.

The Center for Assessment & Evaluation provides support for assessment and evaluation programs, methodologies, and services to the University community, including:
• development, administration, and reporting results of assessments of student learning;
• development, administration, and reporting of institutional survey programs;
• consultation with administrators and faculty about standardized assessment of courses and curricula;
• administration and reporting of secure computer-based classroom testing;
• custom design, production, and statistical analysis of machine-scanable survey instruments;
• administration of standard entering student assessments and reporting of placement and credit results;
• consultation with researchers on the design and analysis of survey instruments for project assessment and evaluation; and
• computer-based testing for commercial institutional entrance examinations.

LSU LIBRARIES

DEAN • Cargill, Joel and Kathleen Ory Professor
OFFICE • 225 Middleton Library
TELEPHONE • 225/578-2217
FAX • 225/578-6125
WEB SITE • www.lib.lsu.edu

LIBRARIANS • Cargill, Kleiner, Phillips
ASSOCIATE LIBRARIANS • Anderson, Bensman, Blessinger, Chanaron, Golyar, Diamond, Griffin, S. Kelsey, Kuyper-Rushing, Martin, Mooney, Morrison, Smyth
ASSISTANT LIBRARIANS • Armstrong, Bell, Daugherty, Fontenot, Hrycaj, P. Kelsey, Laver, Lee, Ole, Patterson, Plankl, Riguey, Russo, Ryan
GENERAL LIBRARIANS • Bolton, Brady, Krause, Meek, Palermo, Sims, Tarbell

The LSU Libraries offer students and faculty strong support for instruction and research through collections containing more than three million volumes, microform holdings of more than five million, and a manuscript collection of more than 12 million items. LSU is part of the Louisiana Online University Information Systems (LOUIS). The library catalogs of most universities in the state are accessible online. Periodical databases and full text journal articles can also be retrieved through the network. The LSU Libraries’ subject strengths include Louisiana materials, sugar culture and technology, Southern history, agriculture, petroleum engineering, plant pathology, natural history, and various aspects of aquaculture including crawfish, wetlands research, and marine biology.
The LSU Libraries belong to the prestigious Association of Research Libraries, which include the top 113 academic libraries in the U.S. and Canada, the Association of South- eastern Research Libraries, the Southeastern Library Network, and the Louisiana Academic Library Information Network Consortium. Middleton Library is the main library, with special collections housed in the adjacent Hill Memorial Library.

The open-shelf arrangement of the main collection in Middleton Library makes material completely accessible; assistance is offered through Reference Services and the periodical desk on the first floor. Information regarding library services, such as the electronic databases and journals and bibliographic instruction, may be obtained from the Reference Desk and through the Library Web site.

Other features of Middleton Library are audio workstations for accessing music and a microforms area. Self-service photocopying machines are available at a nominal cost. When material not found in the Libraries is needed for research, faculty, staff, and students may borrow it through interlibrary borrowing.

LSU Libraries’ U.S. Regional Depository Library collection, the United Nations documents collection, and the U.S. Patent Depository Library collection are housed in Middleton Library. The Libraries has a depository for publications of the federal government since 1907 and has a substantial portion of the U.S. documents in more and after that time. In 1964, the Library became a Regional Depository Library. The holdings of United Nations publications date from the establishment of the United Nations in 1947. In 1981, the Library was designated an official depository for U.S. Patents. The patent collection includes all patents issued from 1871 to the present. The Department also has a collection of scientific and technical reports from the U.S. Department of Energy, the National Aeronautics and Space Administration, and the National Technical Information Service.

The LSU Libraries Special Collections in Hill Memorial Library provide a center for research in the humanities, social sciences, and fine arts. The primary strength of Special Collections is The Louisiana and Lower Mississippi Valley Collections, an outstanding integrated collection that consists of materials documenting the history and culture of the region. It provides rare and early imprints pertaining to the exploration and colonization of the region; books on Louisiana subjects; books by Louisiana authors; Louisiana state documents; extensive and prestigious manuscript collections, which include the personal papers of important individuals in the history of the region, including the Long family; records of businesses, professions, and organizations; and extensive photographic collections.

University Archives, administered by Special Collections and housed in Hill Memorial Library, is the official repository for all permanent records of the academic and administrative units of the University. In addition, the University Archives is the office on campus charged with records management duties.

The Rare Book Collections is wide-ranging and eclectic in nature; with a concentration in 19th century English literature and history; book arts and the history of the book, including the Bruce Rogers Collection; New World exploration and travel; economic history; and science fiction and fantasy. The E. J. McIlhenny Natural History Collection was donated to the LSU Libraries in 1971, in memory of Edward Avery McIlhenny, whose private library forms the core of the collection. Rich in ornithological and botanical art, it is an exceptional resource for researchers in the history of those fields. High points in this collection include James Audubon’s double-elephant folio Birds of America, and the “Native Flora of Louisiana” collection of original watercolor drawings by internationally renowned botanical artist Margaret Stones.

The T. Harry Williams Center for Oral History and the United States Civil War Center are also administered as part of the Special Collections but are located in the Agnes Morris House on Raphael Semmes Drive. The T. Harry Williams Center for Oral History was established in 1991 as an interdisciplinary program that supports and encourages the collection, preservation, and dissemination of the social, political, cultural, and economic history of Louisiana through the use of tape-recorded interviews. Tapes and transcripts generated by the program and its affiliated researchers are deposited in the Louisiana and Lower Mississippi Valley Collections.

The United States Civil War Center was created in 1993. The center’s mission is to promote the study of the Civil War from the perspectives of all professions, occupations, and academic disciplines. Projects and programs include a clearinghouse Web page and the Civil War Book Review.

LSU MUSEUM OF ART

INTERIM EXECUTIVE DIRECTOR • Lindsay FOOTE • Shaw Center for the Arts

The LSU Museum of Art, located in the Shaw Center for the Arts, 100 Lafayette St., houses the University’s permanent fine arts collection of ceramics, drawings, paintings, and sculpture. The collection highlights include English and American decorative and fine arts representing the early 18th through the mid-19th centuries, Chinese jade, and Inuit sculpture. Artists represented by the painting, print, and drawing collections include Thomas Gainsborough, Sir Joshua Reynolds, Benjamin West, and Rembrandt Peale. The museum’s collection of the graphic works of the late Caroline W. Durreux, internationally recognized printmaker, is the most comprehensive in existence. The museum houses outstanding collections of New Orleans-made silver and Newcomb pottery made in New Orleans in the early part of the 20th century. A selection from the museum’s collection of 4,000 objects is always on exhibition. Museum hours are 10 a.m. to 5 p.m., Monday through Friday, 1 p.m. to 5 p.m. on Saturdays and Sundays; closed on University holidays. The museum has an admission fee.

LOUISIANA MUSEUM OF NATURAL HISTORY

CONTACT PERSON • Hafner OFFICE • 119 Foster Hall

The Louisiana Museum of Natural History, the official state museum of natural history, consists of 16 major research collections located on the LSU campus. Together, these collections hold a total of more than 2.8 million specimens, objects, and artifacts that document the rich natural history of Louisiana, the central-Gulf region, and the world. These collections are dispersed among six independently administered units on campus, and include the Vascular Plant Herbarium, the Mycological Herbarium, the Lichen Herbarium, the Log Library & Core Repository, the Louisiana State Arthropod Museum, the Center for Excellence in Paleontology, the Gems & Minerals Collection, the Textile & Costume Museum, and eight collections of the Museum of Natural Science (the Collection of Amphibians & Reptiles, the Collection of Birds, the Collection of Fishes, the Collection of Genetic Resources, the Collection of Mammals, the Vertebrate Paleontology Collection, the Collection of Fossil Plants & Invertebrates, and the Ethnology-Archaeology Collection).

The collections of the Louisiana Museum of Natural History, used actively for education, research, display, and public service, represent an important historical trust for future generations of Louisianan’s citizens. Details about each collection, including educational and exhibits programs, can be obtained by contacting the curator-in-charge of the collection (see individual listings) or by visiting the museum’s Web site.

LSU MUSEUM OF NATURAL SCIENCE

DIRECTOR • Sheldon OFFICE • 119 Foster Hall

The Museum of Natural Science, a subunit of the Louisiana Museum of Natural History, consists of the Division of Zoology, located in Foster Hall, and the Division of Geoscience, located in the Howe-Russell Geoscience Complex. The exhibits in Foster Hall consist of nine major dioramas that depict with meticulous accuracy the flora and fauna of selected scenes from North America, including representatives of Louisiana’s animal life. Other exhibits and visual aids explain various biological and geological principles. The museum’s exhibits are free and open to the public from 8 a.m. to 4 p.m., Monday through Friday (call 578-3080 for information); closed on Saturday, Sunday, and University holidays.

The museum’s Division of Zoology contains extensive research collections, numbering more than 500,000 cataloged specimens.
of birds, mammals, fishes, amphibians, reptiles, and their tissue samples. This internationally known repository of zoological material provides the basis for a program of research and serves as an important aid in teaching biological subjects.

The Division of Geoscience contains the most extensive archeological and geological research collections in Louisiana. The museum’s archaeological collections include more than one million lots from 1,800 sites in Louisiana and many other sites in the Gulf Coast and Caribbean regions. Ethnological collections include material from North and South America, Africa, Australia, Oceania, Asia, and the Arctic. The H. V. Howe Type Collection of fossil ostracoda and the H. B. Stenzel Collection of fossil oysters are among the best of their kind in the world.

The museum is a member of the Association of Systematics Collections, the American Association of Museums, and the Louisiana Association of Museums. Two organizations, Friends of the Museum of Natural Science and Geoscience Associates, support the museum in numerous ways.

RURAL LIFE MUSEUM AND WINDRUSH GARDENS

DIRECTOR • Floyd
OFFICE • 4560 Essen Lane
TELEPHONE • 225/675-2437
FAX • 225/675-2639

The Rural Life Museum, a 28-building complex, is located approximately five miles from campus on the University’s 450-acre Burden Research Plantation. Open daily, this unique museum is divided into three areas. The Barn contains hundreds of artifacts dealing with everyday rural life dating from prehistoric times to the early 20th century. The Plantation consists of a complex of buildings, a country church, overseer’s house, kitchen, slave cabins, sick house, schoolhouse, blacksmith’s shop, sugarhouse, and grist mill, authentically furnished to reconstruct all the major activities of life on a typical 19th century sugarcane plantation. Louisiana Folk Architecture is exemplified in seven buildings, a country church, a pioneer’s cabin and corncrib, potato house, shotgun house, Acadian house, and a dogtrot house, whose divergent construction traits illustrate the various cultures of Louisiana settlers.

Adjacent to the museum are the Windrush Gardens, designed and planted by the late Steele Burden. This five acre expanse of seminatural gardens with winding paths and open areas is reminiscent of 19th century Louisiana gardens. The museum and gardens are open daily from 8:30 a.m. to 5 p.m. Admission is charged.

LSU PRESS

DIRECTOR • Callaway
OFFICE • 3990 West Lakeshore Drive
TELEPHONE • 225/578-6294
FAX • 225/578-6461

Founded in 1935, LSU Press is one of the oldest and largest presses of its kind in the South and one of the outstanding scholarly publishers in the country. Like other university presses, it exists primarily to publish works of scholarship, and its purposes are, therefore, essentially academic.

The LSU Press publishes 70 to 80 books each year. The final decision to publish a manuscript rests with the Faculty Senate University Press Committee, composed of eight faculty members. Over the years, the books which the Press has published have won many important awards, including Pulitzer prizes in fiction and poetry. It has especially earned an outstanding reputation in the fields of southern literature, biography, and history.

NATIONAL CENTER FOR SECURITY RESEARCH & TRAINING

DIRECTOR • Fernandez
OFFICE • 3160 Pleasant Hall
TELEPHONE • 225/578-3299
FAX • 225/578-9119
WEB SITE • www.lsu.edu/ncsrt

The National Center for Security Research & Training (NCSRT) has been established to coordinate efforts in security research and training. The University is currently a leader in providing training on anti-terrorism and counter-terrorism techniques and regularly supports projects initiated by state and federal law enforcement agencies. The purpose of the center is to:

- establish a coordinated, university-based system to promote interaction and collaboration toward the common objectives of safety and security;
- coordinate the activities of existing units that focus on security and emergency preparedness;
- create a collaborative structure that incorporates faculty expertise; and
- partner with private and public entities.

Anti-Terrorism Assistance Program

DIRECTOR • Tucker
OFFICE • 3128 Pleasant Hall
TELEPHONE • 225/578-6757
FAX • 225/578-6915

The Anti-Terrorism Assistance Program (ATAP) provides training to international delegations on anti-terrorism subjects under a cooperative agreement with the U.S. Department of State, Bureau of Diplomatic Security. To date, LSU and its sub-grantees, New Mexico Institute of Mining and Technology (NMT) and Grambling State University, have trained 91 countries that have had terrorist events involving weapons of mass destruction. NCBRT serves as a member of the Domestic Preparedness Consortium and the National Health Professions Preparedness Consortium (in conjunction with the U.S. Department of Homeland Security).

THE SOUTHERN REVIEW

EDITOR • Lott
OFFICE • Old President’s House
TELEPHONE • 225/578-5108
FAX • 225/578-5098

The Southern Review, now in its second series, is a literary journal published quarterly under the editorship of Professor Bret Lott. Founded in 1935 by Cleanth Brooks, Robert Penn Warren, Albert Erskine, and Charles Pipkin, The Southern Review publishes contemporary poetry, fiction, essays, and book reviews, as well as translations and reproductions of visual art. Subscriptions are $25 a year for individuals and $50 a year for institutions. Manuscripts (accompanied by SASEs) and subscription orders should be addressed to The Southern Review, Old President’s House, LSU, Baton Rouge, Louisiana 70803.

COLLEGE OF AGRICULTURE

DEAN • Koonce
OFFICE • 124 Agricultural Administration Building
TELEPHONE • 225/578-2362
FAX • 225/578-2526
The Louisiana State Arthropod Museum (LSAM), located in the Life Sciences Building, is a part of the Department of Entomology and a component collection of the Louisiana Museum of Natural History. The LSAM is the largest repository of insects and related arthropods in Louisiana. It houses approximately 750,000 specimens, including 600,000 pinned specimens, 100,000 fluid-preserved samples, and 30,000 microscope slides. One of the main strengths of the collection is a nationally significant beetle collection. In addition to preserving examples of the non-marine arthropod fauna of Louisiana, the LSAM’s holdings include substantial numbers of specimens from elsewhere in the southern United States, Central and South America, and the Caribbean region.

The LSAM serves the research needs of Louisiana’s scientific community by conserving voucher specimens generated by projects in agricultural entomology, biodiversity, and conservation biology. It serves the needs of the public by providing identifications of insects and other non-marine arthropods and by providing information about their habits and life histories. Specimen loans are made to qualified researchers throughout the world. The LSAM is not open to the general public and no exhibits are maintained, but requests for identifications and related information are welcome.

LSU Textile & Costume Museum

For questions or comments, please contact:

DIRECTOR • Rabalais
OFFICE • 140 Human Ecology Building
TELEPHONE • 225/578-2403
FAX • 225/578-2697
WEB SITE • www.textilemuseum.huec.lsu.edu
E-MAIL • textil@l.su

The Textile & Costume Museum offers changing exhibitions of regional, national, and international interest. Museum hours are 8 a.m. to 4:30 p.m., weekdays. The scope of the museum’s more than 12,000 piece collection is global. Holdings include prehistoric and ethnic textiles and costume as well as contemporary high fashions and high-tech textiles. Types of items include apparel, accessories, household textiles, piece goods, books, patterns, and a variety of items related to textile and apparel production, use, and care. As part of the School of Human Ecology, the museum promotes conservation, research, teaching, and public service. Research includes studies of the technical, aesthetic, historic, and sociocultural significance of textiles and apparel. It is a component collection of the Louisiana Museum of Natural History at LSU.

The organization, Friends of the Textile & Costume Museum, supports the goals and functions of the museum by providing funds for purchases, exhibitions, workshops, and other activities throughout the year.

Public Management Program

HEAD • Naquin
OFFICE • 201 Old Forestry Building
TELEPHONE • 225/578-6645
FAX • 225/578-6473

The Public Management Program (PMP) serves as the research to practice affiliate for the Human Resource Education Program within the School of Human Resource Education and Workforce Development. Incorporating research-based theory and current best practices, this unit offers a comprehensive array of human resource development activities to the public sector on a state, national, and international level. Specific activities include: training program design and delivery; strategic planning services; performance improvement on an individual, work group, and organizational level; process improvement; performance evaluation; adult literacy program development and delivery; curriculum design; program evaluation; organizational development strategies; workplace literacy program development and delivery; cost strategies; succession planning activities; and competency model development and implementation. PMF offers seminars, consultation services, and in-service training programs through traditional classroom instruction as well as state-of-the-art technology-based collaborative learning methodologies. The unit also develops and publishes research quality documents (both internally and through peer review systems) on various governmental and organizational issues. These services are provided by Public Management staff and University professors.

This unit is designated as the sponsoring agency for the Comprehensive Public Training Program (CPTP), a training and educational program authorized by the 1979 Louisiana Legislature. CPTP is designed to increase the skill and knowledge of state employees and non-elected officials. The Certified Public Manager Program (CPM), a nationally recognized and accredited certification program, is open to persons holding a management position within state government or nominated by their supervisors for promotion to such a position. The CPM curriculum includes 300 instructional hours in management and approved elective courses. On completion of the program, participants are awarded the Certified Public Manager (CPM) designation.

COLLEGE OF ART & DESIGN

INTERIM DEAN • Cronnath
OFFICE • 102 Design Building
TELEPHONE • 225/578-5400

Computer-Aided Design & Geographic Information Systems Research Laboratory

DIRECTOR • Kennedy
OFFICE • 216 Design Building
TELEPHONE • 225/578-6134
FAX • 225/578-5040
WEB SITE • cadgis.lsu.edu

The Computer-Aided Design & Geographic Information Systems Research Laboratory (CADGIS) is dedicated to education and research in computer-aided design, geographic information systems, remote sensing, image processing, and other computer applications in the areas of art, architecture, disaster sciences, geography, anthropology, interior design, and landscape architecture. This multidisciplinary laboratory, operated jointly by the College of Art & Design and the Department of Geography & Anthropology, provides specialized support to academic and research units at LSU, to state and federal agencies, and to nonprofit organizations.

Sponsored projects conducted by the laboratory include land-use planning, resource analysis, computer mapping, digital terrain modeling, three-dimensional design modeling, and graphic displays of scientific data. CADGIS develops and hosts a variety of Web sites, including the Louisiana Atlas (http://atlas.lsu.edu).

CADGIS has three instructional laboratories and IP-based video conferencing capabilities. A wide range of software is available, including CAD, GIS, 3-D modeling, animation, video editing, terrain modeling, facilities management, image processing, graphic design, and internet development programs.

COLLEGE OF ARTS & SCIENCES

WEB SITE • www.elop.lsu.edu
E-MAIL • elsi@doce.lsu.edu

The English Language & Orientation Program (ELOP) offers English language training to international students through a variety of course components. These components are designed to enable international students to attain a mastery of English for academic, professional, or personal goals and to facilitate their adjustment to the educational, social, and cultural life of the U.S. through an integrated program of language classes, orientation events, cultural activities, and field trips.

Five Eight-Week Basic Courses are offered each year in August, October, January, March, and June. These courses have a core curriculum of 22 hours per week in reading, grammar, composition, and spoken English. Levels are established by placement tests and range from elementary through advanced. All classes are taught by full-time faculty.

Elective Classes offered to students in the Basic Course include: a 10-hour TOEFL Preparation Class; a 20-hour Conversation Class led by trained American students who meet with small groups of ELOP students;

Admission to the English Language & Orientation Program neither signifies nor guarantees admission to LSU.
Applications to this program may be obtained by contacting the English Language & Orientation Program by mail, telephone, fax, or e-mail.

Southern Regional Climate Center
DIRECTOR • Robbins
OFFICE • E328 Howe-Russell Geoscience Complex
TELEPHONE • 225/578-5021
FAX • 225/578-2912
WEB SITE • www.srcc.lsu.edu

The Southern Regional Climate Center (SRCC), one of six NOAA Regional Climate Centers, provides climate data services for Arkansas, Louisiana, Mississippi, Oklahoma, Tennessee, and Texas. Housed in the Department of Geography & Anthropology, the SRCC is administered by the National Climatic Data Center (NCDC), an agency of the National Oceanic & Atmospheric Administration (NOAA).

The SRCC receives a wide array of National Weather Service (NWS) data via Internet and through a NOAA port satellite receiver. These data are processed at the SRCC and merged with historical climatic archives. These data enable the SRCC staff to monitor and assess the current state of the regional climate and to provide value-added climatic information that promotes regional economic development. The SRCC staff, in conjunction with the LSU Hurricane Center, provides services to state emergency response officials during tropical storms and hurricanes that threaten coastal Louisiana.

Faculty, staff, and graduate students utilize SRCC climatic data and computing resources to perform applied and basic research on a variety of climate-related topics that include rainfall frequency analysis, regional flooding and drought, climatic impacts on agriculture, and numerous issues related to climatic change and variability.

Louisiana Office of State Climatology
STATE CLIMATOLOGIST • Keim
OFFICE • E328 Howe-Russell Geoscience Complex
TELEPHONE • 225/578-6870
FAX • 225/578-2912

The Louisiana Office of State Climatology (LOSC) has been providing climate data services to the state’s public, private, industrial, and governmental sectors since the late 1970s. The LOSC is charged with maintaining historical climate data, as well as monitoring current weather trends for Louisiana, and is supported in this activity by the National Climate Data Center. Located within the Department of Geography & Anthropology, the LOSC is closely linked to the department’s Southern Regional Climate Center and shares the SRCC’s data and computer resources.

Center for French & Francophone Studies
EXECUTIVE DIRECTOR • Cerquiglini
OFFICE • 425 Hodges Hall
TELEPHONE • 225/578-6898; 578-1485
FAX • 225/578-8620
WEB SITE • www2.artsci.lsu.edu/cffs

The Center for French & Francophone Studies develops and encourages interdisciplinary research in French and Francophone literatures, cultures, and language. It provides facilities and opportunities for LSU and visiting faculty as well as for student researchers. The Center is involved with all French and Francophone activities at the University and with state and national organizations. Open to faculty and students, a library of French and Francophone literature and reference materials is also housed in the Center, as is a visual library containing many African francophone films.

Louisiana Population Data Center
DIRECTOR • Singelmann
OFFICE • 30 Stubbs Hall
TELEPHONE • 225/578-5360
FAX • 225/578-5102
WEB SITE • www.lapop.lsu.edu
E-MAIL • joachim@lsu.edu

The Louisiana Population Data Center (LPDC) was established at LSU in 1987 to provide technical support for nationally competitive research proposals in the social sciences. Although the LPDC is housed in the Department of Sociology, its mission is to serve social science researchers throughout the University. Since its inception, the LPDC has supported researchers in Psychology, Political Science, Human Ecology, Agricultural Economics, Social Work, and other academic units. The LPDC is the academic coordinating agency for Louisiana for the State Data Center (SDC) program of the Bureau of Census.

The LPDC director is the inter-University Consortium for Political and Social Research (ICPSR) organizational representative. Through this service the LPDC provides social science researchers at LSU with assistance in acquiring and accessing a vast archive of social science data stored at LSU and the University of Michigan. Funded by the LSU College of Arts and Sciences, access to these data sets is free to LSU researchers.

The center has moved to national prominence through its service and research on key social problems. Because it is self-supporting, research contracts and awards with national and local agencies have been an important component of the center’s activities. Our research has been supported by funding from National Science Foundation, U.S. Department of Agriculture, National Institute on Aging, Minerals Management Service, National Marine Fisheries Service, and the Rockefeller Foundation at the national level, and the Louisiana Departments of Health and Hospitals, Labor, and Social Services, the Metropolitan Council of the City of Baton Rouge, and the Governor’s Office of Elderly Affairs at the local and state level.

Administratively, the director of the LPDC, together with an Executive Committee set Center policy. Senior researchers of the Center make up the Executive Committee. Upon recommendation from the Center’s Executive Committee, the Dean of the College of Arts and Sciences appoints the director of the LPDC for a 5-year term. Funded research is administered through the Office of the Vice Chancellor for Research & Graduate Studies.

Eric Voegelin Institute for American Renaissance Studies
DIRECTOR • Sandoz
OFFICE • 212 Stubbs Hall
TELEPHONE • 225/578-2552; 578-7888
FAX • 225/578-4766
WEB SITE • www.ericvoegelin.org
E-MAIL • esandoz@lsu.edu

The Eric Voegelin Institute for American Renaissance Studies, a humanities-sciences research institute with no instructional program, was created as a unit within the College of Arts & Sciences in 1987. The institute is named for perhaps the greatest scholar-teacher in the history of the University (1942-1958) and one of the original Boyd Professors, Eric Voegelin, of the Department of Government (renamed the Department of Political Science in the 1960s). The institute is devoted to revitalizing the teaching and understanding of the great books of Western civilization in comparison with other civilizations, especially along lines embedded in Voegelin’s own massive scholarship.

Largely supported by private contributions and other external funding, the institute is principally involved in two activities: conferences conducted both in the U.S. and abroad (especially in Central Europe) in the fields of constitutionalism, individual liberty, and political philosophy; and publications (books and monographs) in these same interest areas. It is the principal editorial and financial support unit for the large edition titled *The Collected Works of Eric Voegelin*, University of Missouri Press, 34 vols. projected, of which 31 have been published to date.

Lichen & Bryophyte Herbarium

The Lichen & Bryophyte Herbarium, located in A257 Life Sciences Annex, is a permanent scientific collection of preserved material of more than 45,000 specimens of lichens—the largest collection of its kind in the Gulf South—and several thousand mosses and liverworts. It is the result of the work of Boyd Professor Emerita Shirley Tucker, Department of Government (renamed the Department of Biological Sciences. Geographical emphasis is on species native to Louisiana and the southeastern U.S. Other areas represented include the western and northern U.S., Canada, the American tropics, New Zealand, Europe, and Australia. The collection is particularly rich in tropical and subtropical crustose lichens.

The herbarium is primarily a research and teaching facility. Research programs are in progress on floristics of southeastern U.S. lichens and on ultrastucture of subtropical crustose lichens. On request, specimens are available for loan to other institutions.
Mycological Herbarium

The Bernard Lowy Mycological Herbarium, located in A257 Life Sciences Annex, contains the University's permanent collection of more than 25,000 preserved specimens of nonlichenized fungi from all over the world. It was collected principally by the late Dr. Bernard Lowy, an LSU mycologist and ethnobotanist of international stature. It includes a large representative collection of Amazonian Tremellas and other Basidiomycetes, as well as an important collection of Gulf Coast wood decay fungi. The herbarium is principally a research and teaching facility, and specimens are loaned to other institutions, both domestic and foreign.

Vascular Plant Herbarium

The Vascular Plant Herbarium, located in A257 Life Sciences Annex, houses the permanent, scientific collection of preserved specimens of ferns, fern allies, gymnosperms, and flowering plants. Founded in 1869, it is the oldest herbarium in the Gulf South and presently comprises more than 110,000 specimens, including one of the best collections of Louisiana ferns.

The collection includes dried, pressed specimens and material preserved in alcohol. Many historically important 19th and early 20th century specimens from the Louisiana Gulf Coast are included. New material is obtained through the collecting efforts of herbarium personnel, associated colleagues, amateurs, and through the exchange of duplicates with other herbaria. The goal of the herbarium is to be the premier collection of Louisiana and Gulf South plants, and a resource of international importance.

The herbarium is a reference and service facility, and is an essential resource for all research, teaching, and public service involving identification, classification, economic importance, and ecology of the plants and vegetation of Louisiana, the Gulf South, and the northern Neotropics. Numerous publications are based on the collections; use may be arranged through Dr. Diane M. Ferguson, Collections Manager, A257D Life Sciences Annex. 225/578-5864, e-mail: dfergu1@lsu.edu.

The Louisiana Business & Technology Center (LBTC) was created in 1988 as a joint venture of the University, the Greater Baton Rouge Chamber of Commerce, and the Louisiana Public Facilities Authority. LBTC is now part of the E. J. Ourso College of Business. Its purpose is to enhance economic development in the state through a job creation network. A community resource, LBTC assists new and small businesses by offering:
- management and marketing expertise;
- technology and technical assistance; and
- office space.

The intent is to develop and nurture small business growth as a means of diversifying the economy.

LBTC provides space for new business start-ups in the incubator at South Campus. Companies located in the LBTC can concentrate on production and marketing, which affect success and profit. Day-to-day administrative details and overhead problems are left to the facility manager. The LBTC was named the 2005 National Business Incubator of the Year by the National Business Incubation Association (NBIA) and the 2005 Lantern Award winner in the State of Louisiana for its success in fostering economic development in Louisiana.

The center provides additional services to businesses through its LSU Small Business Development Center, a partnership with the U.S. Small Business Administration and the Louisiana Department of Economic Development; its Louisiana Technology Transfer Office at NASA’s Stennis Space Center in Bay St. Louis, Mississippi; and its linkage to the NASA Small Business Technology Transfer Center (SBTTC). Also, financial consultants provided by the Louisiana Public Facilities Authority offer excellent resources to LBTC’s clients.

Louisiana Small Business Development Center

A partnership with the U.S. Small Business Administration and the Louisiana Department of Economic Development, this center serves small and new businesses in three areas: education, research, and outreach. Job creation and economic development are the main goals of the center.

Students work with entrepreneurs and small business clients to produce business plans, market studies, software programs, and accounting systems. The program provides students with real world experience and practical application of acquired knowledge.

Technology Transfer

The LBTC operates the Louisiana Technology Transfer Office at NASA's John C. Stennis Space Center (SSC) in Bay St. Louis, Mississippi, under a contract from the Louisiana Department of Economic Development. The office is a technology clearinghouse for Louisiana business and industry. Its purpose is to foster technology commercialization and economic development. Close ties were developed with the Federal Laboratory Consortium, which has a wealth of talent and technology available to businesses that can access the system.

Goals of the Technology Transfer Office are:
- to broker technical requirements of Louisiana businesses with the federal agencies;
- to establish a process for matching Louisiana businesses with Small Business Innovation Research (SBIR) grant requests and for assisting businesses in applying for grants;
- to foster local and state economic development by accessing the federal labs for problem solving, innovation, and technology transfer;
- to represent LSU in the Federal Laboratory Consortium and at other national and international forums; and
- to provide access for state agencies, local government, and Louisiana businesses to conduct research and develop technologies.

Entrepreneurship Institute

ASSISTANT DIRECTOR • Carter
OFFICE • 3139-G CEBA Building
TELEPHONE • 225/578-6411
FAX • 225/578-5277
E-MAIL • cacarte@lsu.edu

The Entrepreneurship Institute was formed to address the issues and challenges of entrepreneurship, family business, female entrepreneurs, and franchising. The institute offers programs and activities such as educational seminars and workshops in an executive education format; university course work; business planning, marketing, and management consultation; and venture funding assistance, to give entrepreneurs effective management tools and problem-solving skills with a prime goal of job creation in Louisiana.

The institute is currently focused in four areas: entrepreneurship education designed to educate students, managers, and aspiring entrepreneurs; a family business forum that provides knowledge and experience on topics most crucial for success and survival of family businesses; Women in Business, a seminar specifically designed to aid and female entrepreneurs with start-ups, including four networking sessions annually, mentoring, and educational outreach; and, an international franchise forum that provides expertise and experience to help businesses start their franchising systems, and gives advice on the right franchising system for individuals who wish to become a franchisee.

The institute works with the Louisiana Business & Technology Center (LBTC), a small business incubator on the LSU campus, to enhance economic growth in Louisiana through entrepreneurial development. This development process-network is designed to create successful businesses by providing assistance to stimulate small business formation, growth, and survival.

Public Administration Institute

DIRECTOR • Richardson
OFFICE • 3200 CEBA Building
TELEPHONE • 225/578-6743
FAX • 225/578-9078
E-MAIL • pai@lsu.edu

The Public Administration Institute (PAI) offers the Master of Public Administration (M.P.A.) degree to enhance career opportunities for those planning to enter public service; provide help for those currently employed in public service who want to acquire or to extend their professional knowledge; offer service to those interested in the not-for-profit sector of the economy; and offer training for those who are in the private sector or who intend to work in the private sector who will deal with the public sector. Students from a social science, liberal arts, business, or physical science background are encouraged to apply.

The curriculum consists of course work in the disciplines of finance, economics, political science, management, and statistics. The course work focuses on analytical, quantitative,
and management skills needed by today’s successful public or private manager. Core courses are taught by faculty in the PAE and supporting departments throughout the University. Classes are scheduled to accommodate career professionals, as well as full-time students. Challenging internships in government agencies are available to qualified students.

**Louisiana Real Estate Research Institute**

**DIRECTOR** • Pace
**OFFICE** • 2164 CEBA
**TELEPHONE** • 225/578-6238
**FAX** • 225/578-6366
**WEB SITE** • www.finance.lsu.edu/academics/fnance/re

The Louisiana Real Estate Research Institute was established in 1985 with funding from the Ourso College of Business and the Louisiana Real Estate Commission. It is to encourage, support, and conduct applied and basic research in real estate, with particular focus on real estate and related economic activity in Louisiana. The institute has sponsored nearly 200 research projects, ranging from the analysis of nonparametric location theory to investigation of the effect on housing markets of below-market financing bond issues. An integral part of the institute’s effort is to fund research grants for faculty and graduate students, as well as to provide scholarship support for students.

The institute’s work is closely supported by the Louisiana Real Estate Commission-Endowed Chair of Real Estate, the Latter & Blum Professorship of Business Administration, and the C. J. Brown Professorship of Real Estate. Continued funding for the institute has been provided by the Louisiana Real Estate Commission, Ourso College of Business, the Commercial Investment Division of the Baton Rouge Board of Realtors, and various local and state private corporations.

**Center for Virtual Organization & Commerce**

**DIRECTOR** • Clark
**OFFICE** • 3195 CEBA Building
**TELEPHONE** • 225/578-2126
**FAX** • 225/578-2911
**WEB SITE** • www.cvoc.bus.lsu.edu

The mission of the Center for Virtual Organization & Commerce is to serve the professional and research information systems communities with quality basic research, applied research, and consultation. The Center is primarily engaged in the management of basic research into the development, application and use of decision, e-commerce, and information systems, particularly in virtual organizations. It also has specific programs that support economic development of the information systems and technology industry in Louisiana. The organization’s structure is designed to meet the key objectives of the Center that stem from its mission. These are to with excellence:

- foster economic development of the information systems industry in the Gulf South Region;
- manage basic research programs focused on the extension of knowledge about the development, management, and application of information systems;
- support industry with applied research;
- support industry with selective consultation;
- stimulate basic research in information systems;
- conduct and support research into decision support systems for executives, individuals, and groups; and
- manage a functional executive education, development, and support program.

The Center came into being as an integral part of the long-term strategy of the E. J. Ourso College of Business to position itself as the premier “new economy college of business.”

Additional information is available on the Center’s Web site.

**E-MAIL** • acharya@me.lsu.edu

The mission of the Center for Gas Turbine Innovations & Energy Research (CIER) is to bring university researchers, turbine engine companies, utilities, and industries together to pursue collaborative interdisciplinary research in the area of gas turbines and distributed energy, and to educate and prepare students for opportunities in gas turbine engine companies, utilities, and cogeneration facilities.

The center is staffed with a team of researchers primarily from the College of Engineering, with ongoing collaboration with the College of Basic Sciences, the Center for Advanced Microstructures and Devices, and the Center for Energy Studies. The various researchers have established strong programs in gas turbines and distributed energy or related areas.

**Center for Rotating Machinery**

**DIRECTOR** • Khonsari
**OFFICE** • 2508 CEBA Building
**TELEPHONE** • 225/578-9192
**FAX** • 225/578-5924
**WEB SITE** • www.cerom.lsu.edu
**E-MAIL** • khonsari@me.lsu.edu

The Center for Rotating Machinery (CeROM), established in 2000, was created by an interdisciplinary research group led by faculty in the Department of Mechanical Engineering in close collaboration with business and industry leaders. By providing cutting-edge technological innovations to solve complex problems in engineering systems, the Center serves as an intellectual foundation to the industry with focus on long-range development.

The center fosters the development of the next generation of mechanical components, materials synthesis, and fabrication techniques, and serves the needs of the large industrial base in Louisiana and elsewhere in the nation. Current collaborations exist between researchers in the center and a number of industries as well as the Gulf South Compression Conference steering committee and CAMD. Projects of note include research in the areas of tribology, materials synthesis, characterization, modeling, microfabrication, mechanical, systems, analysis, nondestructive testing, and advanced sensing technology. The center is committed to maintaining a strong partnership with industry through stimulating technological innovation; facilitating commercialization of new research and development; serving as a magnet for attracting new industries to Louisiana; hosting workshops, symposia, and advanced specialty courses for training professional engineers; and providing graduate students with real-world, relevant experience to produce a high quality workforce for Louisiana and beyond.

**Hazardous Substance Research Center**

**CO-DIRECTORS** • Reible; Pardue
**OFFICE** • 3221 CEBA
**TELEPHONE** • 225/578-6770
**FAX** • 225/578-5043
**WEB SITE** • www.hsrc-ssw.org

The Hazardous Substance Research Center/South and Southwest (HSRC) is a five-institution consortium consisting of LSU, as the lead institution, Georgia Institute of Technology, Texas A&M, Rice University, and the University of Texas. The consortium conducts research, outreach, and technology development in the pursuit of critical hazardous substance problems. These investigations focus on the following three categories:

- engineering management of contaminated sites;
- hazardous substances problems of special interest to communities within EPA Regions 4 and 6; and
- hazardous waste site remediation and management.

**Institute for Ecological Infrastructure Engineering**

**DIRECTOR** • Rusch
**OFFICE** • 100 Engineering Laboratory Annex Building
**TELEPHONE** • 225/578-1399
**FAX** • 225/578-8662
**WEB SITE** • www.ieiel.lsu.edu

The Institute for Ecological Infrastructure Engineering, established in 2000 by faculty within the Department of Civil & Environmental Engineering, was created to fully integrate science into the existing engineering infrastructure in the pursuit of ecologically sustainable solutions to environmental and infrastructure problems. This mission encompasses traditional environmental problems in addition to the design and placement of infrastructures like roads and facilities that may impact the
ecology of the surrounding area. The institute has grown to include a cross-discipline set of faculty from LSU and other universities. Current research areas of focus include urban runoff, coastal and small community domestic wastewater treatment using natural and artificial wetlands, industrial waste mitigation, aquaculture, and lakes management.

Louisiana Transportation Research Center
DIRECTOR • Baker
OFFICE • 4101 Gourrier Ave.
TELEPHONE • 225/767-3131
FAX • 225/767-8108
WEB SITE • www.ltrc.lsu.edu/

The Louisiana Transportation Research Center (LTRC) is a cooperative research, education, and technology transfer center jointly administered by LSU and the Louisiana Department of Transportation & Development. The center was established in 1986 by the Louisiana Legislature with the goal of improving the state’s transportation system through basic and applied research, education, and technology transfer. The primary focus of the center is development of nationally recognized research and educational programs in transportation systems resulting in the implementation of more efficient design, planning, maintenance, operation, and construction practices as well as improved safety. LTRC offers courses, seminars, and training sessions designed to enhance the professional capabilities of DOTD engineers and other personnel in the transportation field. LTRC also publishes reports, brochures, and training materials. These publications are available to students in appropriate disciplines.

The LTRC Technology Transfer Center (Local Technical Assistance Program) is part of a national network dispersing the latest in transportation practices to local governing bodies by means of publications, seminars, workshops, and technical assistance.

Louisiana Water Resources Research Institute
DIRECTOR • Pardue
OFFICE • 3221 CEBA Building
TELEPHONE • 225/578-6027
FAX • 225/578-5833
WEB SITE • www.lwri.lsu.edu

The Louisiana Water Resources Research Institute funds research concerned with water resources problems and the enhancement of Louisiana’s water resources, while simultaneously training engineers and scientists to address future problems. Located on the LSU campus, research may be conducted by faculty from universities and colleges statewide. Research topics range from resource management (including flooding and water supply) to water quality (including wastewater treatment and aquifer restoration).

Reilly Center for Media & Public Affairs
DIRECTOR • Moore
OFFICE • 222A Journalism Building
TELEPHONE • 225/578-2002; 225/578-2223
FAX • 225/578-2125
WEB SITE • www.lsu.edu/reillycenter

The Reilly Center for Media & Public Affairs, launched in 2000, is the focus of numerous projects and activities aimed at elevating the quality of civic discourse. The center is housed in the Manship School of Mass Communication, but collaborates with other academic units.

The center supports cutting-edge scholarship and research on all aspects of media and politics. Topics range over a wide variety of issues, including news coverage of government and business, the impact of technology on foreign news coverage, the role of advocacy groups in reaching the electorate, public opinion analysis, and constituent building by public and private entities.

The center has a number of venues for making its research public and useful. It cooperates with LSU Press to publish an ongoing series of books. It also supports symposia, conferences, and a public policy fellows program for the discussion of mass communication and public affairs issues. The Senator John Breaux Symposium is held annually, bringing in outstanding scholars, journalists, public officials, and business and civic leaders. Symposia focus on state and national issues of pressing contemporary importance. Symposia are often published as reports and distributed nationally.

The center co-manages LSU’s Public Policy Research Lab, and conducts the annual Louisiana Survey.

No degree is offered, but the center is tied to the Ph.D. program in mass communication and public affairs, which offers fellowships to support doctoral candidates who assist faculty and the center with research. Work in the center provides valuable experience for students, thereby enhancing the quality of their education. The center also brings in visiting scholars to collaborate on projects and work with students.

The center’s public service arm directly assists media companies, industry, government, and nonprofit agencies by focusing the expertise of superior scholars on practical problems. Projects may include opinion surveys, communication plans, media training, and other special projects.

OTHER RESEARCH PARTNERSHIPS

LSU AGRICULTURAL CENTER
WEB SITE • www.lsuagcenter.com

As the research arm of the LSU Agricultural Center, the Louisiana Agricultural Experiment Station is a major partner in graduate education and research. Research in the major soil, climate, and agricultural production areas is conducted in campus departments and in research stations located throughout the state. Many Agricultural Experiment Station faculty hold joint teaching and research appointments in the Colleges of Agriculture, Arts & Sciences, and Basic Sciences, and the School of Veterinary Medicine. In addition, the Experiment Station provides a large number of graduate assistantships, and laboratories, equipment, and facilities of the station are made available to graduate students.

ARCTIC RESEARCH CONSORTIUM OF THE UNITED STATES (ARCUS)
WEB SITE • WWW.ARCUS.ORG/

The mission of ARCUS is to strengthen and advance arctic research to meet national needs. ARCUS consists of institutions organized and operated for educational, professional, or scientific purposes. An institution is considered eligible for membership in ARCUS if it has made a substantive and continuing commitment to a coherent research program or course of studies leading to degrees in one or more of the disciplines associated with arctic research or related fields. These institutions have a common purpose of advancing science, promoting the application of their knowledge to national problems, and attacking in concert those scientific and technological questions that require the collaborative skills and resources of scientists, engineers, and others throughout the nation and world. For more information contact LSU Consortium Representative Dr. H. Jesse Walker at 225/578-6130.

AUDUBON CENTER FOR RESEARCH OF ENDANGERED SPECIES
DIRECTOR • Dresser
TELEPHONE • 504/861-5105
WEB SITE • www.audoboninstitute.org

The Audubon Center for Research of Endangered Species (ACRES), opened in 1992, is an ambitious and innovative initiative in species conservation. Located in New Orleans, ACRES includes a 36,000 square-foot facility designed to house scientists whose research programs include studies in reproductive physiology, endocrinology, genetics, embryo transfer, and the expansion of a “frozen zoo” to assure the future of endangered species through the banking of genetic materials.

The alliances between LSU and ACRES (joint programming, data pooling, collaborative research, and cooperative funding) enables interdisciplinary field-and-lab teams to conduct far-reaching research programs which range in scope from regional to international.

The knowledge gained through collaborative research between LSU and ACRES will help scientists and conservationists cope with threats to the most seriously endangered species by developing new reproductive technologies and reintroduction techniques necessary to ensure their long-term survival.

For more information contact Dr. Harold Silverman, Office of Research & Graduate Studies, at 225/578-5833 or visit their Web site.
LOUISIANA UNIVERSITIES MARINE CONSORTIUM

DIRECTOR • Dagg
TELEPHONE • 985/581-2803
WEB SITE • www.lumcon.edu

Louisiana Universities Marine Consortium (LUMCON) was formed in 1979 to coordinate and stimulate Louisiana's activities in marine research and education. LUMCON provides coastal laboratory facilities to Louisiana universities and conducts research and educational programs in the marine sciences.

LUMCON's primary facilities are located at the DeFelice Marine Center in Cocodrie, approximately 85 miles southwest of New Orleans. This location, situated within the estuarine wetland complex of the Mississippi River delta plain between the Atchafalaya and Mississippi Rivers, provides ready access to the most productive estuaries in the U.S., to a variety of coastal environments, and to the open Gulf of Mexico.

LUMCON is governed by a six-member Executive Board comprised of chief executive officers of LSU, Nicholls State University, and the University of Louisiana at Lafayette. This board reports to the Louisiana Board of Regents. For more information about LUMCON visit their Web site at www.lumcon.edu.

OAK RIDGE ASSOCIATED UNIVERSITIES

WEB SITE • www.orau.org

Since 1946, students and faculty of LSU have benefited from LSU's membership in the Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 85 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE)—the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, and faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointments and program lengths range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available on the ORAU Web site, or by calling either of the contacts listed below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research, and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact Dr. Harold Silverman, Office of Research & Graduate Studies, ORAU Corporator for LSU; contact Monnie E. Champion, ORAU Corporate Secretary, 865/576-3306; or visit the ORAU home page: www.orau.org.

ORGANIZATION FOR TROPICAL STUDIES

WEB SITE • www.ots.duke.edu/

The Organization for Tropical Studies (OTS) is a nonprofit, scientific, academic consortium whose mission is to provide leadership in tropical biology by promoting education, research, and the wise use of natural resources in the tropics. Founded in 1963, OTS is now composed of 64 premier universities and institutions throughout the world, including LSU. Graduate students at LSU are eligible to participate in the renowned field courses in tropical biology in Brazil, Costa Rica, and Peru and to apply for tropical research fellowships through OTS. Undergraduate biology majors are eligible for the OTS Semester Abroad, an integrated program of environmental sciences and Latin American culture.

OTS is headquartered at Duke University. Courses and research activities are centered in Costa Rica. Three field stations are located in tropical rain forest (La Selva), tropical dry forest (Palo Verde), and tropical montane forest (Las Cruces) environments. La Selva Biological Station, its flagship facility, is a modern biological research laboratory in the midst of a 3,000-acre lowland rain forest preserve. OTS provides logistical support and offers the use of equipment and field stations for field research in tropical biology. Funds are available through OTS for qualified graduate students to initiate research projects.

Additional information regarding the program and course application forms are available from Dr. Bruce Williamson, Department of Biological Sciences, LSU, 508 Life Sciences Building and at bwillus@lsu.edu; or from the Organization for Tropical Studies, North American Office, P.O. Box 90630, Durham, North Carolina 27708 and at www.ots.duke.edu.

PENNINGTON BIOMEDICAL RESEARCH CENTER

EXECUTIVE DIRECTOR • Bouchard
OFFICE • 6400 Perkins Road
TELEPHONE • 225/763-2500
FAX • 225/763-2525
WEB SITE • www.pbrc.edu/

The Pennington Biomedical Research Center (PBRC) conducts research in nutrition and preventive medicine. Many of its full-time scientists hold adjunct appointments at various LSU campuses. Similarly, several faculty at LSU, LSU Agricultural Center, LSU Health Science Center in New Orleans and teaching hospitals hold adjunct appointments at the PBRC.

The PBRC has six major research divisions: Functional Foods, Experimental Obesity, Clinical Obesity and Metabolic Syndrome, Nutrition and Chronic Disease, Health and Performance Enhancement, and Nutrition and the Brain. Within these divisions, basic and clinical research focuses on neurobiology, lipoprotein and insulin metabolism, energy metabolism, molecular biology, genomics, gene expression studies, stem cell biology, proteomics, bioinformatics, transgenics, nutrition and behavior, staple isolates, clinical psychology, clinical trials, biostatistics, and others. The research units of the Center have been consolidated into 13 laboratories that are supported by 16 core facilities. In addition, the PBRC has an Education Program Division.
