7670, 7671 Practicum in Developmental Psychology (1-6 each) Prereq.: consent of instructor. May be taken for a max. of 6 hrs. Supervised experience in the application of psychological principles and techniques to the behavior of normal and abnormal children and adolescents. In addition to the psychology department, the practice of psychology with children and adolescents is supervised in participating schools and clinical settings. May be repeated with change in practice site.

7688, 7689 Practicum in Clinical Psychology (1-3) Prereq.: completion of core requirements in clinical psychology training program. 3 sem. hrs. required. Supervised experience in the application of clinical psychological techniques in clinical settings. 3 sem. hrs. required. Supervised experience in the application of clinical psychological techniques in clinical settings.

7690 Teaching of Psychology Practicum (1-3) Prereq.: PSYC 7990, consent of instructor for a max. of 3 sem. hrs. credit. Closely supervised teaching experience in which students will function as the instructor for an undergraduate psychology course. Objectives include enhanced teaching skills and the development of a philosophy of teaching.

7754 Psychological Assessment Perspectives (3) Prereq.: ENGL 4010. See COMD 7754. Also offered as LING 7754.

7925 Psychological Assessment II (3) Prereq.: PSYC 7125 or equivalent; graduate standing in clinical psychology or consent of instructor. Administration and interpretation of objective and projective tests of personality and psychopathology; neuropsychological and psychophysiological tests or consent of instructor. Common assessment methods and empirically supported treatment procedures for the major adult behavior disorders.

7929 Cultural Diversity Issues in Counseling and Therapy (3) Prereq.: graduate standing in clinical psychology or consent of instructor. Issues of individual and cultural diversity training including definitions of multicultural counseling, historical perspectives, various theories and critical/ethical issues regarding counseling of diverse populations. Practical strategies of service delivery and current research will be reviewed.

7937 Seminar in Behavioral Neurology (3) Prereq.: graduate standing in psychology or consent of instructor. Neuroanatomy of central nervous system and behavioral assessment techniques; neuropathology and diagnostic considerations.

7938, 7939 Seminar in Experimental Psychology (3,3) Each course may be taken for a max. of 12 hrs. of credit when topics vary.

7946 Theories and Concepts of Behavioral Analysis (3) Prereq.: graduate standing in psychology or consent of instructor. A study of behavioral theories and techniques to provide a survey of the theoretical and experimental foundations of the practice of applied behavior analysis. Readings are selected to enhance students’ understanding of the basic principles of learning and behavior; to highlight areas of basic-oriented research which have been useful in the development of applied practices, and to identify areas which may be capable of informing applied practice, but for which research has not yet bridged the gap.

7948 Research Methodology and Application in Behavior Analysis (3) Prereq.: graduate standing in psychology or consent of instructor. Emphasis on the scientific concept of behavior.

7949 Behavioral Consultation and Child and Adolescent Development (3) Prereq.: graduate standing in psychology or consent of instructor. Examination of the behavioral processes and environmental influences associated with typical and atypical child development. Emphasis on verbal, motor, social, perceptual, and cognitive development from the behavioral perspective.

7950 Industrial/Organizational Psychology Internship (3 or 6) Prereq.: completion of general education. May be taken for a max. of 6 hrs. credit. Open only to graduate students nominated by the Department of Psychology and accepted by an approved internship organization. Credit is awarded for successful completion of an internship in an organization in the application of personnel and organizational psychology principles.

7958, 7959 Industrial Problems in Industrial Psychology (3,3) Prereq.: consent of instructor. Each course may be taken for a max. of 12 hrs. of credit when topics vary.

7968 Current Problems in School Psychology (3) Prereq.: graduate standing in school psychology or consent of instructor. Research and methodological issues in school psychology; topics vary.

7969 Internship in School Psychology (1-6) Prereq.: satisfactory completion of the general and language examination and faculty approval. May be taken for a max. of 12 hrs. of credit. May be repeated for additional credit only after completion of supervised internship that is no less than 1,200 hours, half of which must be in a school setting; internship requirement may be fulfilled in connection with an M.S. or M.A. level internship that is at least one full year per week is devoted to direct supervision of each intern. Pass-fail grading.

7971 Advanced Techniques in Clinical Child Psychology (3) Prereq.: PSYC 7125, 7171, and 7925; graduate standing in clinical or school psychology or consent of instructor. Theory and principles of assessment and intervention in childhood psychopathology.

7972 Child Behavior Therapy (3) Prereq.: PSYC 7171 or equivalent; graduate standing in clinical or school psychology or consent of instructor. Behavioral treatment of children’s behavior problems.

7973 School-Based Psychological Interventions (3) Prereq.: graduate standing in psychology. Survey of intervention strategies for various disorders and behavior problems in children and adolescents; relevant assessment techniques; test interpretation; treatment planning based on assessment techniques.

7977 Psychometrics (3) Prereq.: consent of instructor. May be taken for a max. of 6 hrs. credit when topics vary.

7982 Advanced Psychopharmacology (3) Prereq.: graduate standing in clinical or school psychology or consent of instructor. Theory and principles of assessment and intervention in childhood psychopathology.

7983 Biological Variables in Psychopathology (3) Prereq.: consent of instructor. Physical variables in major mental disorders; psychological variables in physical disorders.

7984 Special Topics in Advanced Techniques in Behavioral Medicine (3) Prereq.: PSYC 7185; or consent of instructor. May be taken for a max. of 12 hrs. of credit when topics vary. Assessment and treatment procedures used by behavioral clinicians in medical settings; issues in medical consultation and collaboration.

7998, 7999 Current Problems in Clinical Psychology (3,3) Prereq.: consent of instructor. Each course may be taken for a max. of 12 hrs. of credit when topics vary. Research and methodological issues.

7990 Teaching of Psychology (3) Prereq.: graduate standing in psychology. Required of all doctoral candidates to become instructor of record in the department. Philosophy, theory, and practice in higher education with application to undergraduate instruction in psychology.

7997 Clinical Psychology Internship (3 or 6) Prereq.: completion of course work and general examination. Open only to graduate students supervised by the Department of Psychology and accepted by an approved internship program. May be taken for a max. of 15 sem. hrs. of credit. Supervised evaluation and treatment of individuals manifesting mental disorders.

7999 Professional Considerations in Psychology (3) Prereq.: graduate standing in clinical or school psychology or consent of instructor. Professional ethics, practice, and responsibility.

8000 Thesis Research (1-12 per sem.) 750U grading. 8939 to 8999 Independent Research (1-6 each) Prereq.: consent of instructor. Each course may be repeated for credit; a max. of 15 sem. hrs. in this series is allowed toward doctoral requirements. Pass-fail grading. Depending on the area of independent research, students register for research in: 8939 Experimental Psychology 8949 Social Psychology 8959 Industrial Psychology 8979 Developmental Psychology 8989 Clinical Psychology 8999 Personality Psychology 9000 Dissertation Research (1-12 per sem.) 750U grading.

PUBLIC ADMINISTRATION • PADM

5010 Statistical Methods for Public Administration (3) Prereq.: college algebra. 2 hrs. lecture; 2 hrs. lab. Open only to students in the MPA program. Also offered as EC 5010. Descriptive measures for populations and samples; basic probability theory; distributions of discrete and continuous random variables; expected values; estimation; hypothesis testing; variance analysis; means, variances, and proportions; measures of association; regression analysis; index numbers; applications in public administration.

5060 Microeconomic Theory for Policy Analysis (3) Open only to students in the MPA program or by consent of instructor. Also offered as EC 5060. An introduction to analytical tools of microeconomics; their relevance for decision and policy making in public and nonprofit sectors; theory and demand, production, international trade; choice of competitive versus oligopolistic markets; demand and supply, marginal analysis; models for demand and supply, marginal analysis; models for demand and supply, marginal analysis; choice and efficiency; policy analysis, analytical tools of microeconomics; their relevance for decision and policy making in public and nonprofit sectors; theory and demand, production, international trade; choice of competitive versus oligopolistic markets; demand and supply, marginal analysis; models for demand and supply, marginal analysis; choice and efficiency; policy analysis, decision making under conditions of uncertainty, risk, and uncertainty; statistical decision making with and without sample information; linear programming; and other topics.

7010 Decision Models for Public Administration (3) Open only to students in the MPA program. Also offered as POL 7010. An introduction to analytical tools of microeconomics; their relevance for decision and policy making in public and nonprofit sectors; theory and demand, production, international trade; choice of competitive versus oligopolistic markets; demand and supply, marginal analysis; models for demand and supply, marginal analysis; choice and efficiency; policy analysis, decision making under conditions of uncertainty, risk, and uncertainty; statistical decision making with and without sample information; linear programming; and other topics.

7100 Health Care Administration (3) Prereq.: consent of instructor. May be taken for a max. of 12 hrs. of credit, with special topics in: organization and management issues related to health care delivery including patients’ rights, organizational responsibilities, malpractice issues, relationships among payers, providers and insurers; health care management, patient-provider relationships, advancing technology and medical alternatives, working with limited resources, and organizational efforts to deal with ethical issues.
