Dr. Bridgette Davis is an assistant professor in the School of Education at LSU. She serves as the principal investigator, director, and designer for the Gulf Coast Academy for Science Literacy in which she is responsible for creating and implementing professional development training for middle school teachers using STEM modules with embedded literacy instruction.

As principal investigator of the Gulf Coast Academy for Science Literacy, she works with middle and high school teachers to teach and mentor them through the process of seamlessly embedding research-supported literacy instructional strategies into highly motivating inquiry-based STEM modules.
