June 12, 1986

Dear Alumni and Friends:

As you no doubt realize, the economic prospects for the State of Louisiana are dim. This situation will continue to have significant repercussions for the University and the Department, particularly in the area of salaries for faculty. We hope for better times, but we don’t expect them soon. Remarkably, morale in the Department is still high. We feel we can solve our problems in the future, and we have taken some steps to mitigate them in the short term.

My appeal to your generosity has not fallen on deaf ears. This past year, 86 of you contributed a total of $37,040 (including matching corporate gifts). This is a splendid record for less than 3% of our alumni. Imagine what we could do if 10% contributed, as they do at some other schools. This fall, the Advisory Committee will help us make the final decisions on use of the Development Fund, which now totals about $130,000.

Our lost Alumni list is gradually getting larger, so please make a special effort to help us locate your colleagues who graduated in Chemical Engineering. Also, don’t hesitate to let us know what is happening to you. Everyone likes to hear about the progress of our alumni.

Keep in touch!

Sincerely,

Edward McLaughlin
Chairman
Chemical Engineering Alumni News Letter

This is the fifth edition of our newsletter, which is now an established entity that should continue in the coming years.

An increasing number of alumni are responding to our invitation to visit us when they are in the Baton Rouge area. We hope some of you will follow suit to see first hand some of the changes that have taken place and some that are in progress.

This year we have been contacted by about 150 of you. Keep those letters coming! A closer count of our lost alumni shows this list has risen to about 600. We all need to work hard to reduce the size of this list; it constitutes about 20% of our graduates. Please take it upon yourself to round up a few addresses from known graduates working in your company or living in your area. Every few help. Tommy Landrum (BS ChE 1936) gets first prize for all the 'lost' alumni he 'found' - we need more like Tommy.

On reading through the list of contributors this year, you will see that some of our graduates from overseas contributed handsomely to our appeal, and a special word of thanks must go to them.

We hope you enjoy the news, and even more that you contribute to it in the coming year.

Arthur M. Sterling
THE CHAIRMAN'S REPORT

A lot happened this year and in the words of Charles Dickens perhaps "It was the best of times, it was the worst of times." Best for progress and worst for faculty rewards.

Baccalaureate Reviews

In the fall semester we had our ABET review and expect to have the results sometime this summer. In the spring semester we had the Louisiana Board of Regents review. We have not yet been given a term frame for their verdict, but expect it sometime in the late summer or early fall. A lot of time and effort went into both reviews - let's hope it was all to the good.

Supercomputers

For the first time, actually on April 28, 1986, we logged onto the Cornell Supercomputer facility from our Department. This is a massively parallel system with FFS 264 processors and an IBM 3090 mainframe (3084 at the moment). Strange though it may seem, our use of the Cornell Supercomputer facility arises from our research in thermodynamics, where we simulate the behavior of fluids by confining a few hundred molecules, with assumed intermolecular force laws, in a box and allow them to collide. With this simulation, we subsequently determine the thermodynamic properties. I think supercomputers will dominate a lot of research areas in the future, and it won't be many years before even our undergraduates leave with knowledge of the use of such facilities.

Computer Graphics

For two years, we have had an instructor on our faculty, Margaret Cogan, who has been developing computer graphics software for our instructional and research efforts. We can now do things like prepare thermodynamic surfaces in color and display them on our IBM 5250 terminals, where they can be rotated in three dimensions and examined by our junior class in thermodynamics. We have also developed 3-dimensional graphics for such diverse applications as the molecular structure of zeolite crystals and interactive piping and equipment layouts.

Visiting Faculty

I always consider that a program is making substantial headway when faculty from other universities want to come and spend their sabbatical leave there. By this measure your Department is doing well.

1. Professor Boguslaw Kuszta, from the Technical University of Warsaw in Poland and author of "Modeling and Identification of Dynamic Systems," published by Reprint, has arrived in the Department and will spend the calendar year 1986 with us.

2. Professor Bob Newell, from the University of Queensland in Australia, will spend six months with us, from July of this year.

3. Professor Don Freshwater, Head of the Department of Chemical Engineering at Loughborough University in England, will spend a year with us, starting in August 1986, to work on batch processing.

We would be hard pressed to accommodate more than three at any one time, but this should be a very fruitful year through interaction with these distinguished visitors. Incidentally David Rippin from ETH in Zurich spent several days with us in the spring working on batch processing.

Research Grants and Contracts

Progress continues apace in this area with the total awards to date this year at $1,041,500. One of our best years ever.

Undergraduate Laboratories

The revolution in this area is proceeding apace with Gene Hadlock (father of Susan Hadlock Orten BS 1970) still clearing away everything in front of him and rebuilding equipment right, left and center. In a few years, you won't recognize the unit ops lab when you return.

Again, as with our computer operation, we are seeking industrial support for this activity and we hope to announce significant funding in the next newsletter.

Faculty Awards

We had a lot of activity in the faculty awards area this year:

Frank R. Groves, Jr. . . . . . . . Charles E. Coates Award of the local AIChE and ACS Chapters.

Benny D. Reible . . . . . . . Phi Kappa Phi, Outstanding Non-tenured Faculty award, the Ralph H. Teeter Award of the American Society of Automotive Engineers, and the ASEE national award for New Engineering Education Excellence.

Armando B. Corripio . . . . . Cross-Holloway Award for Excellence in Service to the Department and an Exxon Excellence Award for Teaching.

Douglas P. Harrison . . . . . Exxon Excellence Award for Teaching.

Kerry M. Duoley . . . . . . . Cross-Holloway Award for Excellence in Catalysis and reaction engineering.

F. Carl Knowl . . . . . . . Cross-Holloway Award for Excellence in Research in Supercritical Systems.

David M. Wetzel . . . . . . . George G. Marra Award for the Best Paper of the Year in Wood and Fiber Science.
Graduate Student Awards

David Clary
Campus-wide Best Dissertation Award, Coates Award for best dissertation in Chemical Engineering, Chemistry and Physics. David is the co-author of about 10 papers. David now works for Ethyl Corporation, Baton Rouge.

Scott Williams
AICHE local chapter best dissertation award. Scott has taken a post-doctoral appointment at Los Alamos.

Christopher F. Williams
Ciba-Geigy Travel Award to present a paper at the National Meeting of AICHE in Chicago.

Undergraduate Awards

David Wetzel is the chairman of our undergraduate awards committee. His summary of the awards for this year is given below:

JESSE COATES AWARD
Neal A. Grob

SENIOR SCHOLARSHIP AWARD
Suzanne M. Wintz

Given by the AICHE chapter to the student with the highest GPA during the academic year.

DOW OUTSTANDING JUNIOR AWARD
Karl G. Anderson

Given by DOW to an outstanding junior to recognize achievements in scholarship, leadership, and campus activities.

JUNIOR SCHOLARSHIP AWARD
Nancy Huang

Given by the department to the student with the highest GPA at the end of their junior year.

SOPHOMORE SCHOLARSHIP AWARD
(from National AICHE)
Karl Anderson

Given by the national AICHE to the student with the highest GPA at the end of their sophomore year.

AMERICAN INSTITUTE OF CHEMISTS AWARD
Corey Ann Hay

SPECIAL SENIOR AWARDS 4 YEARS - NO DROPS
Travis R. Dickinson, Jr.
Neal Grob
Michael Dileo

Awarded by the faculty to all students who complete all courses attempted in four years.

BASF SENIOR DESIGN AWARD
First Prize Group I
James Clark
Michael D. Dileo
Paul T. West
Florine Y. Williams

Second Prize Group II
Bucou, Mark L.
Bartez, Ann C.
Witte, Christopher P.
Witte, David H.

Third Prize Group III
Boudreau, Donald A.
Alvaro Jarquin
Alejandro Kupper
Erick R. Mertzoukou

Awarded by BASF to encourage distinction in undergraduate design activities.
Opportunities

I will make my recommendation to the Advisory Committee this fall on use of the Development Fund. Basically, this will consist of dividing the amount in the fund into equal portions, to partially endow two titled professorships in Chemical Engineering. I hope, if all goes well, to name the professorships after Dr. Jesse Coates and Dr. Paul M. Horton, two of our distinguished former Department Heads. Alumni will then be asked to support these positions by their donations through the Development Fund until sufficient capital is accumulated to formally establish the professorships. If approved, it would be our intention to authorize these positions filled when each endowment reached $100,000 and to close them when they reached $150,000. Only the interest, or part of it, would be used to supplement the salary in an existing position.

One has only to look at the University of Texas faculty list to see how far we lag in the area of titled professorships. If our Advisory Committee approves this action, we will be on the way to making some progress in this area.

Industrial Support

As usual, we could not survive without the help of our friends in industry. Companies supporting our efforts this past year were:

DEPARTMENT OF CHEMICAL ENGINEERING
INDUSTRIAL SUPPORTERS 1985

Air Products and Chemicals  Exxon
Allied Chemical  Freeport Chemical Company
Amoco  IMI
Atlantic Richfield  Kaiser
BASF  Marathon
Bebecese  Phillips
Chevron  Shell
Ciba Geigy  Stauffer
Council for Chemical Research  Tenneco
Copolymer  Texaco
Dow  Union Carbide
Dupont  Vulcan
Ethyl

Finale

Despite the current problems of the University we hope to continue building the strength of the Department. Your assistance in the past and in the future will do much to keep us going in the right direction. Our sincere thanks to you all.

DEPARTMENTAL EVENTS AND HAPPENINGS

Annual Lectures

The Bicentennial and Freeport Chemical Company Annual Lectureships were again highlights of our academic year.

The Bicentennial Lecture was delivered by Wolfgang H. Sachtler, who is currently Ipatieff Professor of Catalysis at Northwestern University. He obtained his Dr. rer. nat. from the Technische Hochschule, Braunschweig, in 1952, and then worked at the Koninklijke/Shell-Laboratorium in Amsterdam until 1983. He held part-time appointments at the University of Leiden from 1963 to 1984, when he joined Northwestern. The author of more than 150 papers and 100 invited lectures, he has received the Burwell Lectureship of the North American Catalysis Society and is a member of the Comité de Direction, Institut de Recherches sur la Catalyse, at Lyon in France. His lecture on Multimetal Catalysts was enthusiastically received by an appreciative audience.

The Freeport Chemical Company Annual Lectureship was delivered this year by another distinguished researcher in Catalysis, Gilbert F. Froment from the University of Gent in Belgium.

Dr. Froment obtained his Ph.D. in Chemical Engineering from the University of Gent and did post-doctoral work at the University of Darmstadt in West Germany and at the University of Wisconsin. He is the author of more than 140 technical papers and the well-known book on Chemical Reactor Analysis with H. B. Bischoff. He received the Belgian Alumni Award in 1966, the Cornes Award in 1976 and the B. H. Wilhelm Award in 1986 and is a frequent visitor to the U.S. where he serves as a consultant to several major corporations.

His prime research area deals with the complex catalytic processes encountered in the petrochemical industry and his lecture "Kinetics in Catalysis and Reaction Engineering" had, again, an enthusiastic audience from industry and the university.

Engineering Hall of Distinction

This year we did not have any of our alumni inducted into the LSU Engineering Hall of Distinction. While we still dominate this event, we need to ensure a flow of nominations that will continue to recognize the achievement of our alumni. Please be active in the nomination process.
Advisory Committee

The current roster of committee members is given below:

Members From Industry

C. Glendon Bradley  
Vice-President, Electronic Equipment  
CIBA Vision Care  
Division of CIBA Geigy Corporation

P.L. Thibaut Brian  
Vice-President - Engineering  
Air Products and Chemicals, Inc.

Clarence M. Eidi, Jr.  
Vice President, Petroleum and Synthetic Fuels  
Synthetic Fuels Research  
Exxon Research and Engineering Company

Robert W. Gallant  
General Manager  
Dow Chemical U.S.A.  
Louisiana Division

N.F. Gautreaux  
Senior Vice-President  
Ethyl Corporation

Roy D. Gerard  
General Manager  
Westhollow Research Center  
Shell Development Company

Mary L. Good  
President and Director  
Signal Research Center, Inc.  
Allied-Signal

Paul A. McKim  
Senior Vice-President  
Texas Eastern Corporation

Members from Chemical Engineering Contracting and Consulting Companies

Edward T.L. Borie  
Senior Vice-President  
Walk-Haydel and Associates

Otis G. Roddey  
President  
The Parsons Corporation

Cecil L. Smith  
President  
Cecil L. Smith, Inc.

Member from Louisiana Chemical Association

Fred Loy  
President  
Louisiana Chemical Association

Members from Academia

C. Judson King  
Dean  
College of Chemistry and Chemical Engineering  
University of California

Richard E. Hughes  
Professor  
Past President AIChE  
Department of Chemical Engineering  
University of Wisconsin

Stanley I. Sandler  
H. B. DuPont Professor and Chairman  
Department of Chemical Engineering  
University of Delaware

Our thanks go to Mr. Richard Birdwell who retired this year from his position as General Manager, Louisiana Division, Dow Chemical. Dick now returns to Texas. He was a true friend of your Department and a great help to us over the period of time he served on the committee. Thanks also go to Dr. C. Judson King who served as our chairman this past three years. Ned remains on the committee which will now be chaired by Mr. Clarence M. Eidi, Jr.

As you can see, this is a pretty impressive bunch of people who willingly give of their precious time to help the Department. We are indebted to them for all their efforts on our behalf.

Opportunities

Again let me remind you that, if your company is not a supporter of the Department, we would be pleased to work with you in developing a proposal for the support of our operation. I have repeatedly told you that our major help in obtaining corporate support stems from joint efforts with our alumni who help us approach their corporate foundations. The eminent scholars act is another way to help by using State funds to leverage private funds and establish chaired professorships in the Department.
Visitors to the Department

Among the many visitors to the Department this year were:

Dr. Craig T. Bowman
Dr. K. C. Law
Dr. Dave Pershing
Dr. Edward T. White
Dr. Steve Mehlheuser
Dr. Maurice A. Larson
Dr. Carl E. Lock
Dr. Vance Semecal
Mr. Jacques A. Bodelle
Dr. David W. T. Rippin
Dr. John Beard
Dr. Ronald A. Munson
Dr. Phillip G. Neikle
Dr. Gregory J. McRae
Dr. Richard A. Balhoff
Dr. Richard M. Felder
Dr. William H. Sachtler
Dr. Robert J. Santoro
Dr. Bruce J. Taterchuk
Dr. Charles A. Eckert
Dr. K. D. Papadopoulous
Dr. Phillip A. Bryant
Dr. Gilbert F. Froment
Dr. Philip T. Eubank
Dr. Gerry Lyberatos

Stanford University
University of California, Davis
University of Utah
University of Queensland, Australia
Clemson University
Iowa State University
University of Oklahoma
E.I. DuPont
Elf Aquitaine
ETH, Zurich
Clemson University
U.S. Bureau of Mines
U.S. Bureau of Mines
Carnegie-Mellon University
Shell
North Carolina State University
Northeastern University
National Bureau of Standards
Auburn University
University of Illinois
Tulane University
Exxon
University of Gent
Texas A&M University
University of Florida

Off to Graduate School

Kevin McClanahan, first recipient of the Ron Hartman (BS ChE 1955) Scholarship, is off to UCLA to pursue a Ph.D. in pure mathematics.

Julie Baron is going to pursue a Ph.D. at LSU in Chemical Engineering.

Steve Griffies is going to Northwestern to pursue an MS in applied mathematics before taking up Ph.D. studies in Chemical Engineering elsewhere.

Mary Blanchard will pursue an MS at Washington University in St. Louis.

Nancy S. Huang is going to Rice University to pursue a Ph.D. in Chemical Engineering.

Pin Y. Huang is also going to Rice University to pursue a Ph.D. in Chemical Engineering. Nancy and Pin are sister and brother.

Ann Allen is going to the University of North Carolina to pursue a Ph.D. in Biochemistry.

Faculty Wedding Bells

Two of the faculty got married this summer:

Geoffrey L. Price married Judy Chan. Judy got her Ph.D. in Chemical Engineering from the University of Pennsylvania and is currently helping in the adult reading program in Baton Rouge.

Kerry M. Dooley married Claire C. Hoach. Claire got her B.S. in Chemical Engineering from LSU in 1985 and works at Dow Chemical. Claire was the Dow Outstanding Junior while at LSU. Kerry taught Claire Heat and Mass Transfer and gave her one of the few B's in her career in Chemical Engineering at LSU.
The purpose of our newsletter is to stay in touch with everyone involved with LSU Chemical Engineering. We have tried to condense your correspondence so that you can see what your classmates are doing today. Of the 3 lists this year, the first is of contributors whom we acknowledge separately, the second gives a condensed version of the correspondence we received in response to last year’s newsletter, and the third includes the names of all our alumni for whom we have no address.

LOST ALUMNI

We have no addresses for the following alumni. If you can help us locate them we would appreciate it. I am sure they would also be pleased to receive the newsletter and renew contact with the department.

It is also possible that some of the addresses which we have are incorrect. If you know of a fellow alumnus who is not listed below and is not receiving the newsletter, he falls in that category. Please have him (her) send us the correct address.

15 Cyril T. Helm
15 John R. Hays, Jr.
