

Electrical Engineering Program Educational Objectives

The electrical engineering program at Louisiana State University strives to prepare students to pursue successful professional careers in a global marketplace and/or pursue advanced degrees. The following program objectives focus on achievements of our graduates within five years of graduation.

- Graduates will demonstrate ability to engage in life-long learning through advanced education/degrees, professional development activities, or other career-appropriate options.
- Graduates employed in the electrical engineering industry will demonstrate ability to succeed in leadership roles in their organizations through their technical skills, effective teamwork abilities, communication capabilities or other manifestations of their capability.
- Graduates who attend graduate school will succeed in graduate studies.
