Email sent to all MIE Graduate Students on behalf of Industrial Engineering Professor Hyun Jeon.

Dear MIE students,

The U.S. Department of Energy’s Industrial Assessment Center (IAC) program has been training and developing a “green” workforce since the energy crisis our country faced in the 1970s. The LSU-IAC is looking for and will employ top under/graduate engineering students at ABET accredited institutions to assess manufacturing plants and identify measures that will save energy, reduce waste, enhance productivity, and reduce operating costs.

Students work for the IAC on a paid, part-time basis, under the direct supervision of engineering faculty and staff.

Students will be hired by the LSU-IAC to conduct energy assessments for local industrial manufacturing facilities.

Students will be considered ‘student technicians.’

Qualifications
- No prior industrial assessment knowledge necessary, however excellent communication and leadership skills are required.
- No prior experience necessary; students will be trained upon hiring
- Expected to work 10-12 hours per week during normal business hours
- Must commit a minimum of 3 semesters
- Expected to participate in 2-5 assessments per semester
- Undergraduate or graduate (Master level) students are preferred

If you are interested, please check the below link for submitting the application.
