

Career & Technical Education Research Conference

The CTERC Peer Review Process

A double-blind, peer review process will be utilized. Each manuscript will be sent to three reviewers along with manuscript review forms appropriate for quantitative, qualitative, historical, theoretical/philosophical, or mixed methods research. All reviewers utilized in this process will be individuals who have published research in scholarly journals in career and technical education. *T*-scores will be calculated for all ratings received (to adjust for variances among review teams) and this information will be used to select manuscripts for presentation.
