Agenda topics

**DISCUSSION**

Development for Moodle 1.9 (LSU’s current version) will cease officially after the Law School Post Grades application is completed this Summer.

The Summer roll-out on June 6 will include:

1. An update to the Course Preferences System
2. Inclusion of new gradebook importers for Pearsons products
3. A new untimed role for students that request accommodation from the Office of Disability Services

The roll-out of Adobe Connect at LSU went smoothly and access to the system has now been integrated into Moodle.

A new Development Requirements document was introduced and will be used for all future Moodle suggestions and idea submissions.

The idea of linking the contextual help in Moodle directly to GROK articles was discussed and approved.

Several new suggestions for developments to be included in Moodle 2.0 were brought before the committee for approval or rejection:

1. Add/Drop Tracking Sort options (Approved)
2. Add/Drop Tracking Quickmail Integration (Approved)
3. Keypad ID Sort option (Approved)
4. Addition of “Update” to the Top of Grade QE (Approved)
5. Addition of a Printable Quiz Page option (Approved)
6. Ability to Pull “Preferred Name” from the Mainframe (Shelved for more discussion)

The new theme for Moodle 2.0 was presented, discussed and approved.
