  - Academic Calendar
  - LSU Online Calendars
Drop/Add/Resignation

• Adding or Dropping Courses
  • A course may be added or dropped only in accordance with the dates indicated on the academic calendar. During the drop/add period, the student will initiate the action using the myLSU online registration system. A change from credit to audit is treated as a drop and add action, but it must be approved by The Graduate School by the published deadline. See “Auditing Courses” below for additional information about auditing courses.

• Resignation from the University
  • Dropping an entire course load constitutes resignation from the university for that semester. A graduate student who wishes to resign must first secure approval of the dean of The Graduate School. A resignation form must be completed within 10 days of the date approved by the dean, and in no case later than the date shown on the academic calendar as the final date for resigning from the university. Completion of resignation involves clearance through certain administrative divisions of the university, as shown on the resignation form provided by The Graduate School. A student who abandons courses without resigning will receive a grade of “F” in each course.
What if I give a student an “I” grade?

• If a student is given an “I” grade in an LSU Online course, they have until the final day of class in the next module, whether they register for the next module or not, to complete their work.
  • This is the same graduate policy we have now (except we refer to the next “semester” instead of the next “module”)

ProctorU

- Online proctoring service that allows test-takers to complete their assessment at home while still ensuring the integrity of the exam for the institution.

- The service uses proctors who monitor examinees in an easy, three-step process:
  - 1. ProctorU observes the test taker via a web cam. The student is connected to a real person who speaks with them to guide them through the process.
  - 2. ProctorU observes the test taker's screen in real time. We can see everything that the student is doing both at their location and on screen.
  - 3. ProctorU authenticates the student’s identity. Using a multi-factored process, that is the strongest in the industry, we ensure that the person being monitored is the proper student.

• How it Works
  • http://www.youtube.com/watch?v=4eZYqP02nd4
**Charge the examinee**

ProctorU will ask the examinee to enter their credit or debit card into a secure page that is connected to a third party card processor. Any applicable charges to the examinee shall be paid with a credit card. The page is encrypted and secure, and ProctorU does not see or store the credit card data. Examinees will have to enter their credit card information each time they need to be charged.

The Flex Scheduling option allows students to make their appointment at least 72 hours in advance of their desired start time. Take it Soon gives the student an option to schedule their test within 72 hours of the chosen start time and Take it Now allows them to take their test on demand with no appointment needed.
