Would you like to…
 ✓ See ripples in space-time?
 ✓ Deduce astronomical knowledge from ancient writings?
 ✓ Create clean renewable energy sources?
 ✓ Observe the oscillation of neutrinos?
 ✓ Collect cosmic rays with a balloon?

Then come be an REU program student in the Department of Physics & Astronomy at Louisiana State University! You can be in any undergraduate academic year and need not have a declared major, but must have completed the introductory physics sequence at your school.

Participants are lodged in apartment-style University housing and paid a stipend for food and personal expenses. Further information is available on our web page.
