Master Plan Update

In keeping with the university’s focus on leadership and excellence, LSU embarked on the Comprehensive and Strategic Campus Master Plan process in January 2016. Designed to guide physical development on campus over the next decade and beyond, and aligned with LSU’s strategic plan, it will provide a practical and flexible physical framework and serve as a blueprint to advance the university’s goals.

LSU and NBBJ worked through this summer to develop a Strategic Capital Plan to guide future implementation of the master plan and created a governance process to ensure that the master plan is reviewed regularly, in response to new academic and university goals, strategies, needs and challenges. The creation of an implementation and governance document to accompany this plan will greatly enhance future planning, development, and investment efforts.

Campus Design Guidelines and Wayfinding Guidelines were also revised, and the final master plan report and appendices were prepared for submittal to the Board of Supervisors for approval.

On October 13, the Board of Supervisors approved the Comprehensive and Strategic Campus Master Plan, clearing the way for LSU to move into short-term and long-term implementation of the plan.

Having gauged a broad cross-section of university and community stakeholders in more than 120 engagement sessions during a two-year process, the Master Plan represents the needs and aspirations of the university community. Several key principles emerged from this inclusive and transparent process that will guide future physical development of the campus.

Special thanks go to LSU students, faculty, and staff; our neighbors and community organizations; and partners across Louisiana who contributed both time and expertise toward creating LSU’s Comprehensive and Strategic Campus Master Plan.

INFORMATION TECHNOLOGY SERVICES

- LSU Information Technology Services (ITS) is participating in National Cyber Security Awareness Month throughout October. Each week there are different themes around cyber security and appropriately scary images to accompany them including: identity theft, phishing, social network fallout, and device management. Information is being shared via myLSU, Facebook, Twitter, and the ITS Security Awareness Web site: www.lsu.edu/securityawareness.
- The IT Security & Policy team has brought to IT Governance a request to replace our current mainframe based identity management tool called SAM. The current resource is both homegrown and antiquated. A modern identity access management solution would easily create and maintain new accounts, integrate with new tools and enterprise solutions, and enable better self-service and two factor authentication. We need a modern solution moving forward.
- Progress toward gathering requirements for student modernization and assessing the feasibility and fit of the Workday Student system remains steadily underway. The Project Team has been busy meeting with stakeholders in all of the departments across campus as well as from the multi-campuses. They are moving into scenario building for feasibility and fit testing. The project has a weekly e-bulletin sharing its progress and encouraging involvement. Please learn more and read their latest bulletin at www.lsu.edu/geauxforward.
