Progress by Adapting to a Changing Environment

Madhuri S. Mulekar
Department of Mathematics and Statistics
University of South Alabama, Mobile, AL

January 28
Reception: 3:00 - 3:30 p.m.
Seminar: 3:30 - 4:20 p.m.
155 Coates Hall

"For surviving in this ever-changing environment as a student, faculty, colleague, and administrator, my curious nature forced me to seek out knowledge about these changes and adapt some of them. Every day I find myself encountering something new and exciting and making plans to incorporate some of it in teaching, research, consulting, collaborative activities, and administration. Some plans are successful, and some are still waiting for results or adoption."
