Dissertation Proposal	11
Dissertation Format	11
Ph.D. Final Examination (Dissertation Defense)	12
PH.D. MINORS IN KINESIOLOGY	12
STUDENT APPEAL PROCESS FOR EXAMINATIONS	12
PROCEDURES FOR TAKING KIN 4900, 7505, AND 8900	13
APPENDIX	14
Agreement form for taking KIN 4900, 7505, and 8900 for graduate credit	
Report forms for: Milestone examination, Dissertation proposal, and Thesis proposal	

All policies and procedures in this document follow those specified by the Graduate School and the School of Kinesiology. All students and faculty should consult the General Catalog of the Graduate School Bulletin for further information about policies and procedures not described in this document.

MASTER OF SCIENCE (M.S.) DEGREE

SPECIALIZATION AREAS

Exercise Physiology
Applied/Clinical Exercise Physiology (Thesis and Non-Thesis)
Basic Exercise Physiology (Thesis)

Motor Behavior (Thesis and non-thesis)
Biomechanics
Motor Learning
Motor Control

Pedagogy and Psychological Sciences
Pedagogy (Thesis and Non-Thesis)
Sport Pedagogy (Non-Thesis)

Sport Management (Non-Thesis)

Recommended courses to be taken in each M.S. Concentration are presented in the website. A minimum of 30 semester credit hours are required for thesis program, 24 of which must be in course work and six in thesis research (KIN 8000). For non-thesis programs, the minimum requirement is 36 semester hours. At least one-half of all M.S. degree programs must be in courses at or above the 7000 level. Transfer work from other institutions may not be counted toward this requirement.

A maximum of 6 semester credit hours of independent study can be included in a non-thesis M.S. program.

A total of 12 semester hours of transfer credit from other schools and/or credit taken at LSU as a non-matriculating student may be used in the M.S. degree program, except as noted above. Approval for these hours must be obtained from the student's M.S. advisor, the school director, and the dean of the Graduate School.

TIME LIMIT FOR MASTER'S DEGREES

Programs for master's degrees must be completed within five years from entrance into a degree program. Credit for individual courses taken at LSU more than five years before the termination of a program may be revalidated by the student's graduate committee through an examination. This examination may be oral, written, or both oral and written, depending on the requirements of the department concerned. The documentation of such an examination must be signed by members of the committee and the department's graduate advisor and reported to The Graduate School on the "[Master's Course Revalidation form](#)" before the request for the student's final examination will be approved. Students are responsible for verifying if their department has a revalidation policy. No more than 50 percent of the courses in a student's program may be revalidated and counted toward the degree requirements. For regulations regarding time limits and eligibility of transfer work, see "[Transfer of Credit](#)" under "[Graduate School Regulations](#)". Courses in the School of Kinesiology can be revalidated only under extenuating circumstances, and a maximum of 12 credit hours can be revalidated to count toward the degree.

M.S. Advisory Committees

All students must have an advisor (i.e., a committee chair) to be enrolled in either a thesis or a non-thesis program in the School of Kinesiology.

Non-Thesis Programs

The advisory committee for students in non-thesis programs should consist of three members. These may be from the School of Kinesiology or other departments. The student's advisor must be from the School of Kinesiology and serve as committee chair. At least one of these members must be a full Member of the LSU graduate faculty (see the LSU General Catalog to find a faculty member's of graduate status). Students should ask a faculty member to be their non-thesis advisor. This selection should be done in consultation with the Coordinator of the Specialization areas or School of Kinesiology Director. Faculty members may accept or decline the invitation to serve in this capacity. Final approval of the advisor will come from the School of Kinesiology Director. Selection of committee members should be agreed upon by the student, his/her advisor, the Coordinator of the Concentration area, and the Director of the School of Kinesiology. This committee is responsible for conducting the M.S. comprehensive examination.

Changing Advisors and Committee Members

Changing an advisor may be desirable when such change will enhance the student's ability to achieve his or her academic and professional goals. Should a student decide that it is in his/her best interests to change to a new advisor, the student should first discuss this matter with his/her advisor, the Coordinator of the Specialization area, the KIN Graduate Coordinator, or the School of Kinesiology Director. No change can be made unless another faculty member has agreed to assume the responsibilities of being the student's advisor or major professor. It should be noted that such changes should come from the student's initiative and should not be the result of other faculty solicitation of the student. Should a student wish to change committee members, the student should seek the approval of his/her advisor. No changes can be made unless another faculty member has agreed to serve on the committee.

M.S. Final Examinations

Students in a thesis or non-thesis program must submit to the Graduate School a request for the appointment of the examination committee at least three weeks prior to the final examination. If the student is a degree candidate in the semester in which the final examination is to be taken, this request must be submitted to the Graduate School by the published current semester deadline. Normally, the final examination is taken in the graduation semester. If a student wishes to take the final examination at an earlier date, the student's committee must furnish the Dean of the Graduate School with a sound academic reason for doing so. M.S. final examinations may not be scheduled between semesters or when the university is not "open for business."

Thesis Programs

The preparation of a thesis is an important element in the program leading to the master's degree. The master's thesis should demonstrate capacity for research, originality of thought, and facility in organizing materials. The thesis must be acceptable in subject matter and exhibit creditable literary workmanship. At least six semester hours of thesis credit are required for the master's degree with the thesis option. For additional information concerning thesis preparation, consult the electronic thesis and dissertation guidelines available at etd.lsu.edu/. Final acceptance of the master's thesis rests with a committee of three or more members of the graduate faculty nominated by the chair of the major department and appointed by the dean of The Graduate School. See the "Graduate Faculty" section of this chapter for definitions of full, associate, and affiliate members of the graduate faculty.

The major professor, who must be from the School of Kinesiology, is designated as chair or co-chair of this committee. If either an adjunct or a non-tenure-track faculty member is the major professor, a full-time tenured or tenure-track graduate faculty member must co-chair the committee. Other committee members may be from the major department or from other pertinent departments. If there is an external minor, one committee member must represent the minor department. Both thesis and non-thesis committees must include at least one full member of the graduate faculty, and at least one-half of the committee's graduate faculty members must be full-time tenured or tenure-track faculty members at LSU. Any additions to or changes in the makeup of this committee must be approved in advance by the dean of The Graduate School. The dean of The Graduate School may serve as a member of any committee or may appoint additional members.

Students should ask a faculty member to be their thesis advisor. This selection should be done in consultation with the Coordinator of the Specialization area in which the student is studying or the School Director. Faculty members may accept or decline the invitation to serve in this capacity. Final approval of the advisor will come from the School of Kinesiology Director. Selection of committee members should be agreed upon by the student, his/her advisor, the Coordinator of the Specialization area, and the Director of the School of Kinesiology. This committee is responsible for approving the thesis proposal and conducting the thesis defense (M.S. final examination).

Specific information about the thesis format required by the LSU Graduate School can be found in the document *Guidelines for the Preparation of Master's Theses and Doctoral Dissertations*, which is available online in the Graduate School's website at <http://gradschool.lsu.edu/Electronic%20Theses%20and%20Dissertations/ETD%20Homepage/item14923.html>

Students who complete a thesis must hold a proposal meeting and a final defense. These meetings are open meetings and faculty members and fellow students are encouraged to attend.

Thesis proposal. The thesis proposal is considered a contract between the student and his/her advisory committee. Thus, a written proposal must be developed and approved by the student's committee and kept on file for future reference. The major professor, in consultation with committee members, will establish the format and content requirements for the proposal. There should be a proposal oral defense meeting scheduled for the student and committee after the major professor determines that the written proposal is ready to submit to committee members. Committee members should receive the proposal no less than one week prior to the meeting. If the proposal is approved without revisions required, committee members should sign the M.S. Thesis Proposal Report Form at the meeting (A copy of this form is in the Appendix). Committee members must sign this form when they approve the proposal. If further revision is necessary, the major professor will assume the responsibility of ensuring that the revised version is distributed among the committee members for their approval and signatures on the proposal approval form. A committee meeting does not need to be called to consider the revised proposal unless the committee agrees that one should be called. The major professor should keep a copy of the approved version of the proposal and the signed approval form. The original copy of the signed approval form should be filed in the student's folder in the School of Kinesiology graduate secretary's office. Copies of the approved proposal should be distributed to committee members who request a copy.

Thesis format. The format of the thesis will be determined by the student's advisory committee. Several formats are acceptable for the School of Kinesiology and the Graduate School. The most popular option for students in Kinesiology has been the journal manuscript format, in which the main body of the thesis is a manuscript or manuscripts prepared for submission to a journal.

Each committee member must receive a copy of the thesis two weeks prior to the final examination (the form in which this copy is received, i.e. electronically or paper, will be determined by the thesis committee). The final examination will be an oral examination with all the committee members present. The format and content of this examination will be determined by the advisor and committee members. To pass this examination, the student must receive no more than one dissenting vote from the examining committee. All votes must be recorded on the examination report cards provided by the Graduate School. Also, committee members approving the thesis, must sign the thesis title page provided by the Graduate School. The signed report cards should be completed and forwarded to the School of Kinesiology graduate secretary, who will forward them to the Graduate School.

Final versions of theses. Final versions of theses must be submitted to the Graduate School electronically as pdf documents. Because of this, students are encouraged to include in the thesis relevant still photos, video, movement analysis graphics, etc. that would enhance the thesis and would not be possible to include in a paper version.

Non-Thesis Program

Students in non-thesis programs of study must pass a written comprehensive final examination that will be given by the student's advisory committee and should be approximately three hours in length. Committee members will be solicited by the committee chair (the student's advisor) for questions. These questions will be compiled by the committee chair and given to the School of Kinesiology graduate secretary. The examination will be given on one day each semester and summer session; the date and time is set by the KIN Graduate Coordinator.

To pass the examination, the student must receive a "Pass" evaluation on the examination by the committee member responsible for that section. Should the student receive a "Fail" evaluation on any part of the examination, the student and the committee members(s) involved will set a date and time to administer re-taking that part of the examination (or equivalent) by the student. If the committee member evaluates this second attempt as "Fail", then the whole committee will evaluate this part of the exam in conjunction with the other sections. The student must receive 2 "Pass" votes from the 3 committee members to pass the exam. Students failing to answer a question on the examination will not be permitted to pass the examination until a re-take has been completed.

M.S. students in the *Applied/Clinical Exercise Physiology* program may substitute for the comprehensive exam the American College of Sports Medicine (ACSM) Written Exercise Specialist Examination. Passing this exam will satisfy departmental requirements for the M.S. non-thesis comprehensive examination. Also, in cases where the student in the *Applied/Clinical Exercise Physiology* program includes on his or her committee one or more faculty members under whom the student has enrolled in classes that are largely clinical skills classes (e.g., KIN 7533), the committee may deem it appropriate to include a "practical" exam as one of the comprehensive exam sections. The content of a "practical" section of the exam should be consistent with the goals of the program and course content, and can be an effective tool for assessing the students' mastery of essential clinical skills and decision-making. This approach is uniformly taken in the comprehensive exam for the MS in clinical exercise physiology. In these cases students are required to administer a symptom-limited graded exercise tolerance test. During the test students are required to make decisions about testing based on the case history of the patient, the signs and symptoms presented during the exam, and the results of the test. In addition, the student is asked to make decisions about the treatment course of the patient, and demonstrate a thorough understanding of all elements of clinical wellness programs including patient education, risk factor modification, and exercise prescription.

DOCTOR OF PHILOSOPHY (PH.D.) DEGREE

AREAS OF SPECIALIZATION

Exercise Physiology
Motor Behavior
Pedagogy and Psychological Sciences
Sport Management

There is no specified minimum number of semester credit hours required for the Ph.D. However, recommended courses to be taken in each Ph.D. specialization are presented in the document *Model Programs of Study for M.S. and Ph.D. Degrees in Kinesiology*, which can be found on the Department's website [http://uiswcmsweb.prod.lsu.edu/kinesiology/Graduate_Programs/PhD%20in%20Kinesiology/item48916.html] in the graduate program link. The actual number of courses and hours taken will be determined by the student's major professor and program of study committee.

Ph.D. students are encouraged, but not required to include a minor/cognate area in their programs of study from another department in the university or another specialization in the School of Kinesiology. A graduate faculty member from that department or specialization must be selected who will approve the courses taken to satisfy requirements for the minor/cognate area and who will serve as a committee member. If a minor is from a different department, the graduate faculty member from that department serves as the minor professor and must be designated as such on the doctoral degree audit and exam requests.

Time Limit

The program for the doctoral degree must be completed within seven years from the time a student is classified as a doctoral student. This time limit may not be exceeded except by special permission of the advisory committee, school director and college dean. A formal meeting of the advisory committee must be held to approve any time limit extension.

PH.D ADVISORY COMMITTEES

To be enrolled in the Ph.D. program in the School of Kinesiology, a student must have an advisor (i.e., a major professor who serves as the student's Ph.D. committee chair). The student's major professor must be a graduate faculty member from his/her specialization in the School of Kinesiology. Faculty members may accept or decline the invitation to serve in this capacity. Final approval of the advisor/major professor will come from the School of Kinesiology Director.

The main advisory committee consists of a minimum of three graduate faculty members including the student's major professor, minor/cognate professor (if included in the program of study), and at least one graduate faculty member from either the School of Kinesiology or another department.

At least one-half of the graduate faculty on doctoral committees must be full-time tenured or tenure-track faculty at LSU. A minimum of two of those faculty members must be from the student's major department and at least one of whom must be a full member of the LSU graduate faculty. The remaining members may be from the major department or may be from outside the School/Department if pertinent to the student's area of specialization, with the proviso that at least one of the remaining members must be a full member of the graduate faculty.

Any declared outside minors require representation, either from among the first three members of the committee or by additional appointments to the committee. The Dean of The Graduate School may serve as an ex officio member. Members of the special advisory committee are nominated by the chair of the major department and appointed by the Dean of The Graduate School, who may make any changes deemed desirable.

The Dean of The Graduate School appoints a member or members of the graduate faculty to serve on doctoral general and final examination committees. These individuals represent the dean and the entire graduate faculty. They are full voting members of the committee with all the rights and responsibilities of the other committee

members. In the case of final examinations, it is the responsibility of the committee chair to ensure that the dean's representatives receive copies of dissertations as soon as possible, but no later than two weeks before the date of the examination.

Changing Major Professors

Changing a major professor may be desirable when such a change will enhance the student's ability to achieve his or her academic and professional goals and for the purposes of retention. Should a student decide that it is in his/her best interest to change to a different major professor, the student should first discuss this matter with his/her major professor and the Coordinator of the student's specialization. If necessary, the student may discuss the matter with the graduate program coordinator of the School of Kinesiology and/or the Director. The student cannot change major professors unless another graduate faculty member has agreed to assume the responsibilities of being the student's major professor. It is the responsibility of the student to communicate with his/her current major professor about the change and the proposed chair should ensure that occurs in a timely fashion. It should be noted that such changes should not be the result of other faculty solicitation of the student.

Two other circumstances may occur during the doctoral program of study that are relevant to a transition in major professors. One is when a faculty member who is currently serving as a major professor leaves LSU. That professor is responsible for helping the doctoral student involved to make arrangements for that student's progression. There are three options:

- A. The faculty member can negotiate, as a part of the hiring package, to take the student to the new institution.
- B. The faculty member can work with the student to identify an advisor who is willing to take on that student.
- C. If the student is nearing completion of the degree, the faculty member can maintain research affiliate status for a year, and continue to serve as the co-advisor. The faculty member must return to campus for general or final exams, as required by the graduate school. The School of Kinesiology will not pay the travel expenses. The LSU Graduate School requires that a permanent member of the graduate faculty serve as a co-chair with the faculty member who has left.

If none of these options can be negotiated, the student will leave the doctoral program. It is not the responsibility of the school to continue GA support when the advisor leaves, and students may not continue their doctoral work without an advisor.

The second circumstance is when the major professor determines that the student is not making satisfactory progress toward their degree. The advisor may decline to continue working with a student. It is the responsibility of the current advisor to notify the student in writing that s/he will no longer advise the student. The student cannot continue in the program without an advisor. S/he has one semester to identify another advisor. If another graduate faculty member in the school does not agree to serve as the major professor, the assistantship (if the student has one) is terminated, the student cannot take classes, and is no longer in the program.

Changing Committee Members

Should a student wish to change committee members, the student should seek the approval of the student's major professor. As a courtesy to the faculty member being replaced on the committee, the student should discuss this change with that faculty member.

PH.D PROGRAM OF STUDY

According to the Graduate School, a student is eligible to work toward a doctoral degree beginning with the semester in which he or she is formally admitted into a doctoral program. During the first or second semester in which a Ph.D. student is enrolled, he/she should meet with his/her major professor and determine a future program of study for completing the Ph.D. The importance of this activity establishes a guide for students to follow for completing work needed to obtain the Ph.D.

The student should first prepare a working draft of the program of study. As a courtesy to the student's committee members, course titles and numbers should be listed. A minor professor should be selected and requirements for the

minor should be agreed upon and included in the program of study. Then, the student, together with his/her major professor, should select the committee members who will review the proposed program of study.

Providing their advisor requires a meeting, the student should schedule a meeting of the program of study committee to discuss and approve a program of study. The student should provide copies of the draft program of study to the committee members at least one week before the meeting. In the meeting with the committee, the student should first orally present his/her academic and professional background and goals, his/her research interests for the dissertation, and how the proposed program of study will help attain his/her academic and professional goals and carry out his/her dissertation research. The committee may approve, amend, or not approve the program of studies. If the proposed program is not approved, the major professor will assume responsibility for ensuring that the revised version is distributed among committee members for their approval. A committee meeting is not necessary for this revision unless the committee determines one should be called. The student's chair will then prepare a final program of study form to be held by their advisor. It is recommended that a copy of this form be filed in the in the student's folder in the School of Kinesiology secretary's office. Additional copies should be held by the student.

The student's departmental-level academic course plan is subject to Graduate School policy and departmental requirements. Graduate course work taken at another institution with grades of "A," "B," "P," and "S," or the equivalent, is not subject to the policy on transfer of credit for the master's degree, and may be included in the departmental-level academic course plan if accepted by the school and the student's advisory committee.

MILESTONE EXAMINATION

All Ph.D. students must complete a milestone examination within two years of admission to the School of Kinesiology. This examination serves as the student's qualifying exam for continuing in the Ph.D. program. The exam consists of carrying out a research project that must be approved by the student's advisory committee. The committee will determine the procedures for approving the project. Options for the milestone exam research project are: (1) an article published in an approved research journal, (2) a manuscript accepted for publication in an approved research journal, or (3) a research presentation at an approved national or international conference. In each case, the student must be the first author. The format of the written document for these substitutes can be: (1) a copy of published article, (2) the manuscript accepted for publication, (3) the manuscript of a research presentation at an approved national or international conference. The student's major professor and program of study committee will determine which research journals or conferences satisfy the milestone requirement. The research on which the manuscript/article is based may have been completed at another institution (e.g., Master's thesis research). A copy of the Milestone Examination report form is in the Appendix. Committee members must sign this form when they agree that the student has satisfactorily completed the requirements for the exam. The signed form should be kept in the student's file folder in the School of Kinesiology graduate secretary's office. The major professor and student should also keep a copy of the signed form.

GUIDELINES FOR PH.D. GENERAL EXAMINATION AND DISSERTATION PROCESS, SCHOOL OF KINESIOLOGY

At or near the end of the completion of a Ph.D. student's required coursework, the student should schedule the general examination. This exam may not be scheduled between semesters and only when the university is officially "open for business." According to the Graduate School, the general examination should be considered as a comprehensive assessment of the student's "expert competence over broad segments of the major field and a high degree of familiarity with the content of a current progress in one or more minor fields." Further, "the procedure should be sufficiently rigorous so as to provide reasonable confidence that the student who passes it may proceed successfully to a doctoral degree." Students on probation are not allowed to take the general exam and each student must be registered for a minimum of 1-3 credit hours during the semester they take the exam.

In the School of Kinesiology, this exam is conducted by the student's advisory committee, which is selected at the time of applying to the Graduate School to take the general examination. In addition to the student's advisory committee, a Graduate Dean's representative will be appointed to serve as a committee member for the general examination. This representative will continue to serve on the student's committee through the final examination. A "request for the general examination must be submitted to The Graduate School by the student's department chair at

least **three weeks** prior to the proposed examination date.” Any changes to the committee “must be approved in advance by the Dean of The Graduate School.”

The general examination consists of two parts: one written, the other oral. The written portion consists of writing a research literature review paper. The oral portion is typically a defense of the review paper, although the oral examination need not be limited to topics related to the paper.

The Written General Examination: A Research Literature Review Paper

The purpose of the written portion of the general examination is to develop an original review of the research literature related to the student's dissertation topic. This paper should be either a potentially publishable document, suitable for publication in a refereed journal that publishes such reviews or as a chapter in an edited book or serve as a chapter in the traditional dissertation format approach. A journal-oriented document will be included as an Appendix in the student's dissertation (if the student chooses to use a journal format for the dissertation) to provide an extended review of the research literature.

Procedures for preparing the review paper. The student should develop a written proposal describing the intended purpose, scope and organization of the review paper for the advisory committee. This proposal should be no more than 10-typewritten pages, with the organization and content of the proposed review paper presented in annotated outline form. This proposal should be distributed to the student's doctoral advisory committee no later than one week before a meeting of the student and the committee. The purpose of this meeting is to discuss the proposal in terms of its acceptability and appropriateness for the general examination requirement, its relevance to the dissertation research topic, and its potential for publication. Committee approval of the proposal is required before the student begins writing the literature review paper. The committee and student should also agree on a date for completing this review paper and for having the oral examination of the review paper. The final version of the review paper should be submitted to the examining committee at least **two weeks** prior to the oral examination. It should be noted that the oral examination is not restricted to questioning concerning the review paper.

Oral Examination

The oral examination will involve the advisory committee plus the Dean's Representative, who will have a vote. There is no prescribed format or length of time required for this examination. To pass the general examination, the student must receive no more than one dissenting vote from the examination committee. All votes of the examining committee must be recorded and signed on the examination report cards provided by the Graduate School. These cards should be given to the School of Kinesiology graduate secretary who will forward them to the Graduate School. If the student fails the general examination, the advisory committee will attach a memorandum to the report card “specifying if the student will be allowed to retake the exam and any time constraints.” Further, the advisory committee will determine the appropriate steps to be followed by the student with regard to continuing in the Ph.D. program. A written report of these steps should be completed with copies given to the committee members, the student, and filed in the student's folder in the School of Kinesiology graduate secretary's office.

Given the nature of the oral portion of the general examination, a doctoral student has the prerogative to limit attendance to the committee members for a general exam if he or she wishes to do so. If, however, the doctoral candidate elects to combine the general examination with the presentation of the dissertation proposal, she or he forfeits the right to limit attendance to the committee, as it is the departmental policy that all proposal meetings must be open meetings.

Continuous Registration Requirement

Doctoral candidates must maintain continuous registration for a minimum of three semester hours of credit each regular semester (excluding summers) from the completion of the general examination to the end of the semester in which an approved dissertation is submitted to The Graduate School.

Dissertation

According to the LSU Graduate Bulletin, the dissertation "must demonstrate a mastery of research techniques, ability to do original and independent research, and skill in formulating conclusions that in some way enlarge upon or modify accepted ideas". The form of the dissertation must be in accordance with the instructions in the electronic thesis and dissertation guidelines available online at etd.lsu.edu.

Dissertation Proposal

The dissertation proposal is considered a contract between the student and his/her advisory committee. Thus, a written proposal must be developed and approved by the student's committee and kept on file for future reference. The major professor, in consultation with committee members, will establish the format and content requirements for the proposal. There should be a proposal oral defense meeting scheduled for the student and committee after the major professor determines that the written proposal is ready to submit to committee members. Committee members should receive the proposal no less than one week prior to the meeting. The Dean's representative should be invited to participate in the proposal process, although this participation is not required. Dissertation proposal meetings are open meetings for all members of Kinesiology and all faculty members and fellow students are strongly encouraged to attend.

If the proposal is approved without revisions required, committee members should sign the Ph.D. Dissertation Proposal Report Form at the meeting (A copy of this form is in the Appendix). Committee members must sign this form when they approve the proposal. If further revision is necessary, the major professor will assume the responsibility of ensuring that the revised version is distributed among the committee members for their approval and signatures on the proposal approval form. A committee meeting does not need to be called to consider the revised proposal unless the committee agrees that one should be called.

The **major professor** should keep a copy of the approved version of the proposal and the signed approval form. The original copy of the signed approval form should be filed in the student's folder in the School of Kinesiology graduate secretary's office. Copies of the approved proposal materials should be distributed to committee members who request a copy.

Dissertation Format

Specific information about the dissertation format required by the LSU Graduate School can be found in the document *Guidelines for the Preparation of Master's Theses and Doctoral Dissertations*, which is available online in the Graduate School's website at:
<http://gradschool.lsu.edu/Electronic%20Theses%20and%20Dissertations/ETD%20Homepage/item14923.html>

Final versions of dissertations must be submitted to the Graduate School electronically as pdf documents. Because of this, students are encouraged to include in the dissertation relevant still photos, video, movement analysis graphics, etc. that would enhance the dissertation and would not be possible to include in a paper version.

The format of the dissertation content is determined by the student's dissertation committee. Several formats are acceptable for the School of Kinesiology and the Graduate School. The most popular option for many students in Kinesiology has been the journal manuscript format, in which the main body of the dissertation is a manuscript or manuscripts prepared for submission to a journal. If this format is used, the Appendix of the dissertation increases in importance. The review paper, if done for general examination, should be included in the Appendix. Additional Appendix materials include detailed descriptions about equipment, instrumentation, computer programs, questionnaires, etc. used in the research, as well as more detailed information about results, such as individual results and statistical analyses not included in the main body of the dissertation. Also, if in press or published journal articles are to be included in the dissertation, these may be included as described in the *Guidelines for the Preparation of Master's Theses and Doctoral Dissertations* (revised March 2009).

PH.D. Final Examination (Dissertation Defense)

The final examination can be scheduled no earlier than one "academic" year after the student passes the general examination. One "academic" year in this case, according to the Graduate Bulletin, is the "interval between a general examination held early in one term and a final examination held toward the close of the following term." The final examination may not be scheduled between semesters or when the university is not officially "open for business." A request for the final examination must be submitted to the Graduate School on the appropriate Graduate School form at least three weeks prior to the proposed examination date, which must be on or before the published deadline for the current semester deadline (see **Academic Calendar for each individual semester deadline**). In no case should this request be submitted less than five weeks prior to the final date for submitting approved dissertations and final examination reports to the Graduate School. The examination committee, including the Dean's Representative, must have copies of the dissertation at least two weeks prior to the date of the final examination. The examination committee will determine whether the student should provide paper or electronic copies of the dissertation prior to the dissertation defense.

The final examination will be an oral examination primarily concerned with the dissertation, although the committee may opt to extend the subject matter. There is no prescribed format or length of time required for this examination. The major professor and committee members will be responsible for establishing the format and content of this examination. Dissertation defenses are open meetings for all members of Kinesiology and all faculty members and fellow students are strongly encouraged to attend.

To pass the final examination, the student must receive no more than one dissenting vote from the examining committee. All votes must be recorded on the examination report cards provided by the Graduate School. Committee members who approve the dissertation should also sign the dissertation approval page. The signed examination report cards and dissertation title pages should be completed and presented to the School of Kinesiology graduate secretary, who will forward them to the Graduate School. Students are not permitted to handle the report cards; that is the responsibility of the student's chair. However, it is the student's responsibility to handle the approval pages. If the student fails the final examination, the advisory committee will attach a memorandum describing the to the report card "specifying if the student will be allowed to retake the exam and any time constraints." Further, the advisory committee will determine the appropriate steps to be followed by the student with regard to continuing in the Ph.D. program. A written report of these steps should be completed with copies given to the committee members, the student, and filed in the student's folder in the School of Kinesiology graduate secretary's office.

PH.D. Minors in Kinesiology

Ph.D. students from other departments who choose Kinesiology as a minor should be expected to take at least 12 semester hours of graduate credits to satisfy their requirements for a minor. The actual number of semester hours as well as the courses (which can include independent study) required for the minor will be determined by the student's minor professor.

Student Appeal Process for Examinations

Should a student fail any of the M.S. or Ph.D. examinations described in this Manual and feel that an inappropriate decision was made, he/she may appeal the decision. This appeal should be made in writing to the KIN Graduate Coordinator who will then appoint an ad hoc appeals committee to review this appeal. This ad hoc committee will include the KIN Graduate Coordinator, the Director of the School of Kinesiology, and one KIN faculty member who is a full member of the graduate faculty but is not a member of the student's examining committee. The ad hoc committee will review the written appeal and then ask the student, the student's advisor, and any committee member(s) directly involved in the appeal situation, to meet individually with the ad hoc committee. The ad hoc committee will then provide a decision concerning the appeal and present this decision to the student and the advisory committee.

Procedures for Taking KIN 4900, 7505, and 8900 for Graduate Credit

KIN 4900 (Independent research), KIN 7505 (Problems in Kinesiology) and KIN 8900 (Independent research) are designed to provide students an opportunity to do independent research with individual faculty members. These courses are not designed as alternatives to required courses in a student's program but should be considered as courses in their own right that can be included in a student's program of study. The number of semester credit hours for KIN 4900 and 8900 is variable for any one semester, while KIN 7505 is for three semester credit hours. For KIN 4900 and 8900, the number of credit hours should be based on equivalent hours of work expected for a regular classroom course of similar credit. For example, a course for three semester credit hours requires 45 hrs. in the classroom during the semester plus the expectation of approximately the same number of hours outside the classroom. Similarly, students enrolled in KIN 4900 or 8900 should expect to engage in at least 90 hours of work during the semester. Because both 4900 and 7505 require that a grade of A, B, C, D, or F be given, it is important that bases for evaluation of student work be developed. Students in KIN 8900 receive a Satisfactory (S) or Unsatisfactory (U). It is important for students wishing to sign up for hours in these courses first to discuss this with the faculty member with whom they wish to work. Then, the faculty member and student should complete the Student-Professor agreement form for these courses (a copy of this form is in the Appendix of this manual). This form provides a contract-type agreement between the student and faculty member. The student must register for the section of the course that is designated as the faculty member's section. The faculty member is responsible for submitting the semester grade for the student.

APPENDIX

**STUDENT-PROFESSOR AGREEMENT FOR
GRADUATE CREDIT FOR INDEPENDENT STUDY
[KIN 4900, KIN 7505, KIN 8900]**

Student's Name _____

Advisor/Major Professor _____

I wish to register for _____ semester hours of graduate credit for KIN _____ for the
_____ Semester under the supervision of Professor _____.

To fulfill the requirements for these credit hours, I plan to do the following:

Signed _____

Date _____

For the Professor

I agree to supervise the above named student in KIN _____ for the work described above
for _____ semester credit hours.

Signed _____

Date _____

**LOUISIANA STATE UNIVERSITY
SCHOOL OF KINESIOLOGY
M.S. THESIS PROPOSAL REPORT**

Student:

Title of Thesis Proposal:

Date of Oral Defense of Proposal:

Date of Approval of Proposal:

Advisory Committee:

Names (please type)

Signatures

**LOUISIANA STATE UNIVERSITY
SCHOOL OF KINESIOLOGY**

PH.D. MILESTONE (QUALIFYING) EXAMINATION REPORT

Student:

has satisfactorily completed the requirements for the Milestone Examination as specified in the School of Kinesiology Policy and Procedures Handbook.

Date of examination:

Date student entered Ph.D. program:

Title of research project manuscript:

The manuscript submitted for this examination is based on (check one of the following):

_____ Research project for the milestone exam

_____ Published article -- Cite reference:

_____ Manuscript accepted for publication -- Give journal title, and acceptance date:

_____ Presentation at a research meeting – Give full citation:

Advisory Committee:

Names (please type)

Signatures

Chair:

**LOUISIANA STATE UNIVERSITY
SCHOOL OF KINESIOLOGY**

PH.D. GENERAL EXAM PROPOSAL REPORT

Student:

Title of General Exam Proposal:

Date of Oral Defense of Proposal:

Date of Approval of Proposal:

Advisory Committee:

Names (please type)

Signatures

Chair:

**LOUISIANA STATE UNIVERSITY
SCHOOL OF KINESIOLOGY**

PH.D. DISSERTATION PROPOSAL REPORT

Student:

Title of Dissertation Proposal:

Date of Oral Defense of Proposal:

Date of Approval of Proposal:

Advisory Committee:

Names (please type)

Signatures
