Catalog Description
Introduction to theories and practical approaches for analyzing social media data.

Office: 272 Coates Hall

Contact information
Seungwon Yang, Ph.D., Assistant Professor in SLIS & CCT
Email: seungwonyang@lsu.edu
Office hours: by appointment

Course Description
In this course, students will learn both theoretical and practical knowledge regarding analysis and visualization of social media data in two aspects – (1) networks and (2) content of social media. To support students, who are not familiar with computing and visualization tools, we will use easy-to-follow user guides and tutorials for setting up and using the software tools. By the end of the class, students will have skills and hands-on experience of analyzing and reporting analysis results for real-life social media data.

Course Objectives
Upon satisfactory completion of this course, the student should be able to:

- Apply computing and visualization tools for analyzing social media data.
- Describe results of analysis for textual content and networks of social media data.
- Exhibit professionalism in planning, conducting analyses, and reporting analysis results for social media research.

Textbooks

  *Note: Additional readings will be posted to the Moodle as needed.

Course Topics and Schedule:
• Topics to be covered in the class are presented below. The posting of discussion topics, homework assignments, project descriptions, and their due dates are marked as D (discussion), H (homework), PD (project description), or PR (project result/deliverable).
• Students are required to complete and submit their homework assignments, discussions, and project reports/deliverables before the midnight of due dates, unless otherwise specified.
• Homework assignments may involve reading assigned papers, and then creating concept maps to visually present the key concepts and their relationships based on the content of the papers. Other types of homework will also be assigned as well.

* Keys:
  - D1-D5: Discussion postings in the Moodle forum
  - H1-H2: Homework assignments
  - PD1, PD2: Project descriptions posted
  - PR1, PR2: Project results (deliverables/reports) due

**Weekly Topics and Readings in Detail**

**Week 1: Course introduction and syllabus review**

- Chapter 1 from the textbook “Social Network Analysis” by John Scott.

**Week 2: Social network analysis basics (part 1)**
• Chapters 2, 3, and 4 from the textbook “Social Network Analysis” by John Scott.

Week 3: Social network analysis basics (part 2)

• Chapter 6 from the textbook “Social Network Analysis” by John Scott.
• Chapters 4, 5 from the book “Social Network Analysis” by Christina Prell.
• D. Austin, “It’s a small world afterall” http://www.ams.org/samplings/feature-column/fc-2012-08

Week 4: Influence and centrality

• E Bakshy, J. M. Hofman, W. A. Mason, D. J. Watts. 2011 “Everyone's an influencer: quantifying influence on Twitter” In Proceedings of Int. Conf. on Web Search and Data Mining (WSDM)
• Freeman, L. 1979 “Centrality in Social Networks: Conceptual Clarification”, Social Networks 1, No. 3.
• Bonacich, P. 1987 “Power and Centrality, a family of measures” The American Journal of Sociology, Vol. 92, No. 5.

Week 5: Tools for social network analysis (part 1)

• Learn how to use Gephi. https://gephi.org/users/
• Gephi tutorial. https://gephi.org/users/tutorial-visualization/
• Other useful tools
  o Cytoscape
  o D3 visualization JavaScript library

Week 6: Tools for social network analysis (part 2)

Creating a simple dynamic network: https://tinyurl.com/tutkbda
• Gephi tutorial on dynamic networks
  https://edisciplinas.usp.br/pluginfile.php/4204986/mod_resource/content/1/gephi_tutorial_dynamics.pdf
• Converting a network with dates into a dynamic network

Week 7: Information diffusion

Week 8: Project 1 Due. No class.

Week 9: Social media content analysis

Week 10: Tools for content analysis (part 1)

• Word cloud tools
  o  Wordle.net
  o  Wordart.com
• Twitter data collection and content analysis
  o  TAGS

Week 11: Tools for content analysis (part 2)

• Twitter data collection (given tweet IDs)
Week 12: Sentiment analysis

- Sentiment analysis tools:

Week 13: Geospatial data mining

Week 14: Privacy in social media

17th ACM conference on Computer supported cooperative work & social computing - CSCW '14, CSCW '14, pages 831-841, New York, NY, USA. ACM Press.

Week 15: Applications: crisis events, politics

- Tweeting Super typhoon Haiyan: Evolving Functions of Twitter during and after a Disaster Event by Clarissa C. David et el. (2016).
- Microblogging in crisis situations: Mass protests in Iran, Tunisia, Egypt by Andrea Kavanaugh et al.
- Using Social Media to Enhance Emergency Situation Awareness by Jie Yin et al.
- Social Media and the Decision to Participate in Political Protest: Observations From Tahrir Square by Zeynep Tufekci et al. (2012)
- The Personalization of Politics: Political Identity, Social Media, and Changing Patterns of Participation by W. Lance Bennett (2012).

Week 16: Project 2 Due. No Class.

Grading Policies
All assignments are due on the dates indicated in the Course Schedule. Work submitted more than 7 days late without an acceptable excuse will be downgraded one full letter per week. Work submitted more than 7 days late without an acceptable excuse may be refused.

A grade of B indicates that the student has achieved the objectives and met the requirements for the course. A grade of "A" indicates that the student has exceeded the requirements and demonstrated a superior understanding of the principles and concepts involved. A grade of C indicates that the student has partially met the requirements, but demonstrates an incomplete understanding of the principles and concepts involved. A grade of D indicates that the work does not meet the requirements and demonstrates a lack of understanding. A grade of F indicates that the student did not meet any of the course requirements or objectives.

Final grades will be computed from the following activities
Homework Assignments (2 x 10% = 20%) 20%
Discussions (5 x 4% = 20%) 20%
Project 1: Network Analysis Project 30%
Project 2: Content Analysis project 30%
Total 100%

Description of activities that will be graded

- Homework Assignments & Discussions (participation)
  Students are expected to participate in the weekly discussion and/or exercises via the Moodle discussion forums. Discussion questions and/or class exercises will be posted in Moodle and students must complete them by the designated time. The topics of the three assignments are:
    - HW #1: Creating a social network graph with Gephi visualization tool
      - Undergrad students: work on a single social network, and identify central figures (nodes) in the network, etc.
      - Grad students: work on two social networks in total, and identify central figures (nodes) in each network, etc.
    - HW #2: Analyzing and summarizing the content of tweets using word cloud software tools
      - Undergrad students: develop 3 word clouds and discuss about them
      - Grad students: develop 5 word clouds using groups of tweets and discuss about them

- Projects
  There are two projects around the topics of network analysis and content analysis for social media data. Students are expected to work with existing software tools and real datasets for both projects.
    - Project #1: Network Analysis of Social Media Data
      - Students will apply network analysis software for constructing and analyzing social networks. Datasets for the social networks will be
provided by the instructor. Using various techniques, students will find major players in the network, as well as other network information by computing centrality measures, identifying communities, etc.

- Project #2: Content Analysis of Social Media Data
  - Students will apply opensource tools for analyzing the textual and metadata content of social media data, which will be provided by the instructor. Approaches may involve word cloud development, sentiment analysis, and/or named entity recognition.

- Deliverables for Students for Each Project: the deliverables may include a project report, which may include answers to multiple questions. Undergraduate students and graduate students will include different amount of content in their report. Details of the report requirements will be provided later.

**Expectations**

LSU’s general policy states that for each credit hour, you (the student) should plan to spend at least two hours working on course related activities outside of class. Since this course is for three credit hours, you should expect to spend a minimum of six hours outside of class each week working on assignments for this course. For more information see: http://catalog.lsu.edu/content.php?catoid=12&navoid=822.

**Academic Integrity**

Louisiana State University adopted the Commitment to Community in 1995 to set forth guidelines for student behavior both inside and outside of the classroom. The Commitment to Community charges students to maintain high standards of academic and personal integrity. All students are expected to read and be familiar with the LSU Code of Student Conduct and Commitment to Community, found online at www.lsu.edu/saa. It is your responsibility as a student at LSU to know and understand the academic standards for our community.

Students who are suspected of violating the Code of Conduct will be referred to the office of Student Advocacy & Accountability. For undergraduate students, a first academic violation could result in a zero grade on the assignment or failing the class and disciplinary probation until graduation. For a second academic violation, the result could be suspension from LSU. For graduate students, suspension is the appropriate outcome for the first offense. The most recent version of the Code of Student Conduct is available at http://www.lsu.edu/saa

**Information for Students with Disabilities**

LSU policy requires a student who claims disability status to make a formal request for accommodation through the Office of Disability Services, 115 Johnston Hall, phone 225-578-5919. This office provides the necessary evaluation and recommendations to ensure full participation in the course. For more information, go to http://www.lsu.edu/disability.

**LSU Student Code of Conduct**
The LSU student code of conduct explains student rights, excused absences, and what is expected of student behavior. Students are expected to understand this code as described here: http://students.lsu.edu/saa/students/code. Any violations of the LSU student code will be duly reported to the Dean of Students.

**Attendance**
Policy Statement 22 governs what will be accepted as an excused absence in this course. A student is required to notify the instructor in advance of the deadline if the student is unable to complete the assignment by the deadline due to an excuse consistent with Policy Statement 22. In the event of an emergency, a student must notify the instructor within five days and request an extension for any missed assignments. The instructor reserves the right to request documentation before granting approval for a make-up assignment.
