</table>

The learning contract is a formal agreement between the student, field supervisor and faculty liaison, which identifies the specific learning competencies of the specified field course, and the learning tasks/activities to be assigned to the student to permit attainment of those competencies. Students must complete a learning contract within the first three weeks of beginning their placement within the assigned agency. Learning Plan reflects the required learning competencies for this course and samples of learning activities are included on the sample plan and list distinguishing foundation and advanced activities provided in the field manual.

I. SUPERVISION
Describe the plan for the structure of supervision to be utilized this semester, including both content and process.

II. SCHEDULE
Please attach a Schedule of Anticipated Days form. This should reflect School and/or agency closures, holidays, workshops or personal matters that are anticipated. (Please calculate the anticipated hours to ensure that this schedule will meet the 240 hour requirement).

SIGNATURES: Required signatures including—student, field supervisor, on-site supervisor (if applicable) and liaison.

STUDENT: ____________________________________________

LCSW SUPERVISOR: ____________________________________________

TASK SUPERVISOR: ____________________________________________

(IF APPLICABLE)

FACULTY LIAISON: ____________________________________________

(The student is responsible for submitting a final copy of the Learning Plan to the Field Office, not the supervisor or liaison.)
Overview: The function of the learning plan is to articulate what the student will be learning in the agency, how the learning task will help the student meet his or her field competencies, identify the length of time expected to complete the learning task, and how to assess how the objective will be successfully completed. This plan serves as the formal agreement between the student, supervisor, and field liaison. Building upon the overall framework for direct practice developed in the first year Foundation learning experiences, students develop mastery of the skills, knowledge and values for advanced competency in agency settings. Advanced Internship I and Advanced Internship II experiences will go beyond providing generalist knowledge and experience and provide the opportunity for Advanced Competency and will be the basis of the evaluation for advanced student performance. As the Field Competencies are built on a developmental continuum, the plan will include activities to expose students to develop Competence (SW7502) and finally Advanced Competence by the end of SW7503.

Directions: Activities will reflect advanced opportunities to develop Competence in the first field course (SW7503) through Advanced Competency by the end of the second course (7503). Each competency should have **2-3 activities** listed. There is a list of Advanced activities and sample plan to help distinguish between Foundation I/II and Advanced I/II activities in the field manual.

Note: Some activities will be listed under multiple competencies. **Client** may refer to individual, family, group or community.

**II. Engage Diversity and Difference in Practice Competency**

**Skills to develop:**
- Ability to apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels
- Student presents themselves as learners and engage clients and constituencies as experts of their own experiences
- Ability to apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies

---

**III. Advance Human Rights and Social, Economic, and Environmental Justice Competency**

**Skills to develop:**
- Ability to apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels
- Student engages in practices that advance social, economic, and environmental justice
**IV. Engage In Practice-informed Research and Research-informed Practice Competency**

**Skills to develop:**
- Student uses practice experience and theory to inform scientific inquiry and research
- Ability to apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings
- Student uses and translates research evidence to inform and improve practice, policy, and service delivery
V. Engage in Policy Practice Competency

Skills to develop:
- Ability to identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services
- Ability to assess how social welfare and economic policies impact the delivery of and access to social services
- Ability to apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice

SW7502 Competence: Student will demonstrate competence

VIII.  Intervene with Individuals, Families, Groups, Organizations, and Communities Competency

**Skills to develop:**

- Ability to critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies
- Ability to apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies
- Ability to use inter-professional collaboration as appropriate to achieve beneficial practice outcomes
- Ability to negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies
- Ability to facilitate effective transitions and endings that advance mutually agreed-on goals

**SW7502 Competence:** Student will demonstrate competence

IX.  Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

**Skills to develop:**

- Ability to select and use appropriate methods for evaluation of outcomes
- Ability to apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes
- Ability to critically analyze, monitor, and evaluate intervention and program processes and outcomes
- Ability to apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels
