President O'Connell called the meeting to order at 2:35 p.m. and welcomed Robert Edgeworth (Classical Languages), Elsie Hubert (Archives & Records Management Committee Chairman), Carruth McGhee (Dean of Academic Services), and press representatives Albert Comeau, Rachel Emanuel-Wallace, and Carl Redman.

Parliamentarian for this meeting was Robert J. Edgeworth

1. Approval of the Minutes of the meeting of July 23, 1986. There being no additions or corrections, the Minutes were approved as distributed.

2. Address by Chancellor Wharton to be followed by discussion

Budget Cuts. The Chancellor asked the University Budget Committee (which includes the 6 Vice-Chancellors, the Comptroller, and 2 faculty members elected by the Faculty Council) to figure out where and how the budget could be cut. He asked for no across-the-board cuts, in other words, he wanted vertical and horizontal cuts. The authority for the budget cuts was vested with the Deans. The Chancellor emphasized the fact that the Deans are the major financial administrators of the campus. The Deans met with department heads and together came up with recommendations that were taken to the Budget Committee for study and consolidation. Seventeen graduate degrees and 9 undergraduate programs were eliminated. An overriding consideration in all deliberations was the necessity of protecting the core areas of the university. Decisions were based on the quality of the program, the enrollment and the investment which would be required to sustain the program. Many cuts were made in public service areas which, because of their nature, produced a strong reaction outside the university. Cuts were also made in various administrative areas. The Chancellor is proud of the way the Budget Committee handled its assignment.

Pay Raises. The criteria for the raises was based on promotion, equity & merit. The decisions were made by the Deans of the colleges, with the help of the department heads, by comparing LSU’s rank by department to SREB average salary data for comparable ranks/departments, salary inequities as determined by EEO and national averages, and salary in relationship to market. Most raises were 6% to 10% and 78% of the faculty received an increase in pay. Because of these pay increases, now is a good time for department heads to discuss increased faculty productivity.

Changes in the Athletic Department. The Chancellor is pleased that the NCAA has adopted Rule 48 which requires that athletes meet a minimum ACI score for admittance. Rule 56 is also in effect, which requires athletes to follow a course of study toward a degree. He complimented Head Football Coach Bill Arnsperger for his excellent work in helping the athletes to achieve the required academic goals. In addition, the Chancellor urged the Faculty Senate to maintain contact with the university’s Athletic Council but recommended against too active involvement in athletic issues.

Junior Division. There are 4625 entering freshmen students this semester, with an average ACT score of 19.91. There has been a 6% to 7% increase in number of students who made a score above 36. Chancellor Wharton believes the new entrance requirements to LSU have had an effect on the higher quality of entering students. He predicts there will be on-line telephone registration within two years and that with the planned improvements to the record keeping system and the implementation of the General Education Component, the Junior Division as a large college will eventually no longer be necessary.

Computer Hardware. The university continues its efforts to improve main-frame capabilities. In particular, vector processing capabilities are planned. The university has committed $1 million a year for the next five years toward improving the campus computer capabilities. Also, it is intended that research computing will eventually be separated from administration computing. However, the university does not plan to diminish its budget by supporting the purchase of such items as mainframe and micromachines which should be the responsibility of the individual departments and colleges. If we do not support major computing, approximately $4 million per year in grant funds will be lost. This would reduce revenues to the general fund by $1.6 million per year.

Proposals for the Future. The future financial picture looks very bleak at this time. The colleges and/or departments are urged to obtain more outside financial grants etc; this applies to the humanities just as much as to the rest of the departments while recognizing that individual grant monies in the humanities are generally much less than in the case of science and engineering. The university will try to absorb future cuts and not cut academics.
President O'Connell called the meeting to order at 2:35 p.m. and welcomed Robert Edgeworth (Classical Languages), Elsie Hebert (Archives & Records Management Committee Chairman), Carruth McGee (Dean of Academic Services), and press representatives Albert Comeaux, Rachel Emanuel-Wallace, and Carl Redman.
