

SLO - Senior Project
CM Student Learning Outcomes

Description

Seniors in the CM 4202 Construction Enterprise course complete a construction project that directly measures seven Program SLOs requiring the students to "create" or to "apply" the learned outcome.

- Acceptable Target: Scores equal to or higher than 70 points on related SLO
- Ideal Target: 80 points or higher
- Implementation Plan (timeline): Data gathered each semester; analyzed each academic year
- Key/Responsible Personnel: Instructor of record for CM 4202 Construction Enterprise.

Direct assessment for:

- SLO(1) Oral Presentation - Create written communications appropriate to the construction discipline.
- SLO(2) Writing Skills - Create written communications appropriate to the construction discipline
- SLO(3) Project Safety Plan - Create a construction project safety plan
- SLO(4) Estimate - Create construction project cost estimates
- SLO(5) Project Schedule - Create construction project schedules
- SLO(9) Multidisciplinary Team - Apply construction management skills as a member of a multi-disciplinary team
- SLO(10) Applying Technology - Apply electronic-based technology to manage the construction process

CM 4202 Construction Enterprise - Senior Project

Program - AIC Associate Constructor Exam
CM Student Learning Outcomes

Description

The American Institute of Constructor's (AIC) Associate Construction (AC) Level One exam provides a national comparison to other construction management institutions within the US. AIC assesses 20 SLOs and these are the same program SLOs adopted by the BSCM degree program.

- **Acceptable Target:** 65% passing. Note: national average is around 65% passing.
- **Ideal Target:** 75% passing
- **Implementation Plan (timeline):** Data compiled each academic semester. Analyzed annually.
- **Key/Responsible Personnel:** Instructor of record for CM 4202 Construction Enterprise.

Description

The American Institute of Constructor's Associate Construction (AC) Level One exam provides a national comparison to other construction management institutions within the US. AIC assesses 20 SLOs and these are the same program SLOs adopted by the BSCM degree program.

- Acceptable Target: 70% of the student answering the questions correctly
- Ideal Target: 80% of the students answering the questions correctly
- Implementation Plan (timeline): Data gathered each semester; analyzed each academic year
- Key/Responsible Personnel: Instructor of record for CM 4202 Construction Enterprise.

Direct Assessment:

- SLO(6) Analyze professional decision based on ethical principles.
- SLO(7) Analyze construction documents for planning and management of construction processes
- SLO(8) Analyze methods, materials, and equipment used to construct projects
- SLO(12) Understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process
- SLO(13) Understand construction risk management
- SLO(14) Understand construction accounting and cost control
- SLO(15) Understand construction quality assurance and control
- SLO(16) Understand construction project control processes
- SLO(17) Understand the legal implications of contract, common, and regulatory law to manage a construction project.
- SLO(18) Understand the basic principles of sustainable construction
- SLO(19) Understand the basic principles of structural behavior
- SLO(20) Understand the basic principles of mechanical, electrical and piping systems.

SLO Senior Exit Exam
CM Student Learning Outcomes

Description

Graduating seniors take an a comprehensive exit exam in their last semester in college. It assesses our twenty BSCM program SLOs indirectly or directly.

- Acceptable Target: 70% of the student answering the questions correctly
- Ideal Target: 80% of the students answering the questions correctly
- Implementation Plan (timeline): Data gathered each semester; analyzed each academic year
- Key/Responsible Personnel: Instructor of record for CM 4202 Construction Enterprise.

Direct Assessment:

- SLO(6) Analyze professional decision based on ethical principles.
- SLO(7) Analyze construction documents for planning and management of construction processes
- SLO(8) Analyze methods, materials, and equipment used to construct projects
- SLO(12) Understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process
- SLO(13) Understand construction risk management
- SLO(14) Understand construction accounting and cost control
- SLO(15) Understand construction quality assurance and control
- SLO(16) Understand construction project control processes
- SLO(17) Understand the legal implications of contract, common, and regulatory law to manage a construction project.
- SLO(18) Understand the basic principles of sustainable construction
- SLO(19) Understand the basic principles of structural behavior
- SLO(20) Understand the basic principles of mechanical, electrical and piping systems.
