Registration (remote):
https://unl.zoom.us/meeting/register/sReDjaR1QtiwrTTf8aHhHA

The Fostering Inclusive Academic Communities, FIAC, Committee invites all attendees of i3CE25 to an open discussion to learn how students and faculty have been impacted due to current events and shifting policies.

Description: This session will be an open discussion for ASCE Computing Division's academic community members to learn about each other's experiences of recent changes, discuss current and future impacts, and identify areas where we can continue to building sustainability and resilience in our research, teaching, and professional environments.

We will provide space to talk about current events, their impact on our academic spaces, and discuss ways we can navigate those, as we continue to conduct research and train future engineers to be professional, ethical, and to serve our diverse communities.

This discussion is for all academics and disciplines in the scope of i3CE 2025. No prior knowledge is needed. All identities are welcome.

Please join us to participate in the discussion.

No registration is needed for in-person participants. Remote participants, register: https://unl.zoom.us/meeting/register/sReDjaR1QtiwrTTf8aHhHA
