May Trainings & Workshops

You can find additional information on the Training & Events website.

- **Student Learning Assessment Planning**
  - Wednesday, May 5 | 9:00 – 10:00 AM | Registration Link

  Assessment planning provides a quick overview of the essential parts needed to complete your program’s plan: mission statement, student learning (SMART) outcomes, curriculum map, and direct and indirect methods. At the end of the workshop faculty will leave with an assessment plan that can be uploaded into Taskstream.

- **Design Your Blended Course**
  - Wednesday, May 12 | 10:30 AM -12:00 PM | Zoom Link

  The workshop will guide faculty in developing a course that combines the best of face-to-face and online learning. In this workshop, we will discuss the basic principles of designing a blended course, including strategies for selecting appropriate activities suited to each modality and integrating them in creating a cohesive learning experience.

- **Facilitating an Online Course: Effective Instructional Practices**
  - Thursday, May 13 | 11:00 – 12:00 PM | Zoom Link

  This workshop examines strategies faculty can use to actively engage learners and create instructor presence in building a meaningful learning environment. We will discuss the role of faculty in providing guidance in the form of regular, substantive interactions and feedback on assignments throughout the course. Participants will have opportunities to practice editing and performing instructional activities in Moodle (e.g., providing feedback, grading, and communicating with students).
