THIS COURSE IS ABOUT HOW PEOPLE GAIN POWER OVER OTHERS, HOW THEY USE IT AND OFTEN LOSE IT AND HOW WE CAN RESIST THE POWER OF OTHERS. It is also about networks of power and the power of organizations, groups, tribes, associations, constituencies. It is also about the covert or hidden power that undergirds social myths and societal beliefs and how these have been used to manipulate us.

FLASH! Much of that power is exercised through verbal and symbolic communication. The strategic use of communication to gain the cooperation of others, to resist the power of big institutions or to bring bullies to their knees will be featured. This course will also explain why leadership is a difficult matter and why good leadership is rather rare.

TEXTBOOKS--REQUIRED
Hedges, Chris, War Is a Force That Gives Life Meaning (Anchor Books)

Browning, Christopher, Ordinary Men: Reserve Police Battalion 101

BEGIN GROUP ASSIGNMENT: PASS OUT GROUP PROBLEMS.
FRENCH AND RAVEN'S KINDS OF POWER

Read these case histories and write a solution. Then tell us which kind of power (if any) you are using. Not using power may be a solution and if the kinds of power don't seem to fit or have any, explanatory power please say so. This is a group exercise and we ask everyone to sign the decision. You will present this orally during the next session.

Case Histories  (Making Decisions in Crisis Mode)

1. You are boss of Blue Wave Swimming Pools. You are sub contracting with Mr & Mrs. Smith’s Tile Company who put their pretty tiles around the pools and despite a few rough patches these good people have served you well for nearly thirty years. Recently your contract expired and Big Daddy and Big Mama Smith demand a huge increase in pay for the same services. Their demands will cut into your profits rather deeply and jeopardize the raises you were planning to give your people at the end of the fiscal year. Furthermore, the Smith’s daughter and your son are engaged and rumor has it that wedding bells soon will chime. On the other hand, Fleece ‘Em and Git Tile Company has offered to subcontract for a price considerably lower than the original Smith price, and you have seen their tile work, work that is superior to the standard of the Smith’s. You have two earth moving equipment operators, a rebar crew, an electrician, and sales rep working all of whom know about the new contract demands. They are anxious about their jobs and angry at Big Daddy and Big Mama Smith. How would you solve this problem and might it involve using any of the kinds of power Raven and French talk about?

2. You are the CEO of Flashman Company, a producer of widgets. One of your workers, a handsome and youthful male, tell you that a female foreman has sexually harassed him. He tells you that she has requested his “services” and if he does not comply she will make him lose his job or be demoted with the punch press department. The female foreman has a spotless record and lots of time-in-grade. When they confront each other the conversation turns into a he said/she said. Charges and counter charges are made and then denied. The situation is a bit unusual, and there are no third party
witnesses. How might you think about resolving the situation? Might these involve any Raven/French power moves?

Case History # 3

3. You own a small Mom & Pop Grocery Store called Home Place. One of your best customers, the wealthy and politically active, Agatha Wuthering-Steele, buys $600 worth of your groceries and as they go through check out she asks your clerk, Little Jimmy Olsen, a question abut the grapes she is buying: “I say fellow, do you support the grape boycott going on in Northern California?” Little Jimmy says: “I cannot tell a lie, Ms Wuthering-Steele, but my boss doesn’t even know about it and so does not support it.” “Well, I won’t shop here any longer,” Ms. Agatha expostulates, and stalks out of the store. The groceries contain at least two hundred dollars of frozen treats and ice cream. These items are left melting on your counters and most of these items are now too damaged to return to your freezer. How do you deal with Ms. Agatha Wuthering-Steele? Might you use a Raven/French power move?

Case Number Four

You are managing a gifted young boxer named Canvasback Craig. He has a devastating right hand and is headed straight to the top. You know that he is an imposing physical specimen and that he has fast hands but you know little about his basic character. You suspect he is fixated on short-term goals and that a small purse today is more real to him than a big purse next year. You once caught him trying to install brass knuckles in his boxing gloves and began to wonder about his sanity. You now find that out is planning to throw the next fight and that the manager of the ham and egg has-been fighter, Glass Jaw McGraw, has offered him a mere ten thousand dollars to take a dive. Do you confront McGraw’s manager? Do you drop Canvasback? Discipline him? Blow the whistle to the boxing commissioner? Go to the press? Get Canvasback to break the deal without telling his manager or opponent? Do you tell him to give up on his devastating right
hand and open a diner that serves chicken that has a devastating taste? What leverage do you have? What risks do you take? Which Raven/French strategies might be exercised?

Case Number 5

A bully is beating up your son on the playground. Joe Weider tells you to give the boy physical combat skills to smash the bully. Your neighbor advises you talk to teachers and the super at the school. Others say go to the parents of the bully and reason with them. Dr. Butchmort tells you to use legal threats against the school and to scare the parents of the bully. Biceps Bucher tells you to call the parents of the bully out in the street and have a neighborhood confrontation. The bully’s teacher tells you to bring in a professional school conflict negotiator, Parker Pacifier. The local music teacher tells your son to carry a tape of Mozart suspended in his navel so that it will play calming music when the bully chases him across the school yard. What course of action will you take? What kinds of Raven/French power might be involved if any?

Case Number 6

You are part of a team working to elect a candidate. Several of your advertising and media people have threatened to move to support a rival candidate. They point out that your candidate’s opponent pays nearly 25% more for the same jobs. You discover that you will be unable to pay that sum without undermining your candidate’s travel budget just at a time when maximum exposure is needed. You are called upon to persuade these discontented people to stay on the campaign and continue to receive the same compensation without hope of an increase during the campaign. What can you do to try to keep them on your team?
