

Louisiana State University's (LSU) Department of Communication Sciences & Disorders offers several unique features that distinguish its program:

Comprehensive Degree Programs: LSU provides bachelor's, master's, and doctoral degrees in Communication Sciences and Disorders, catering to a diverse student population.

State-of-the-Art Research Facilities: The department houses advanced research laboratories that include technologies such as ultrasound, EEG, deep brain stimulators, functional near-infrared spectroscopy (fNIRS), stroboscopy, full audiology suite, and more!

Diverse Clinical Training Opportunities: Students gain practical experience through the on-campus clinic, which serves over 300 clients annually from various cultural, linguistic, and economic backgrounds. Additionally, LSU has partnerships with nearly 40 off-campus sites, including hospitals, schools, and private practices, providing a broad spectrum of clinical experiences
