

2018 Preferred Drug Formulary

The following is a list of the most commonly prescribed drugs. It represents an abbreviated version of the drug list (formulary) that is at the core of your prescription-drug benefit plan. The list is not all-inclusive and does not guarantee coverage. In addition to using this list, you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate.

PLEASE NOTE: Brand-name drugs may move to nonformulary status if a generic version becomes available during the year. Not all the drugs listed are covered by all prescription drug benefit programs; check your benefit materials for the specific drugs covered and the copayments for your prescription-drug benefit program. For specific questions about your coverage, please call the phone number printed on your member ID card.

| | | | | | |
|--------------------------------------|--|-----------------------------------|--|--|---------------------------------------|
| A | B | betamethasone dipropionate | ELIDEL | FYCOMPA | INVOKAMET XR |
| ABILIFY MAINTENA [INJ] | baclofen | COLCRYST | ELIQUIS | G | INVOKANA |

KEY

[INJ] – Injectable Drug

For the member: Generic medications contain the same active ingredients as their corresponding brand-name medications, although they may look different in color or shape. They have been FDA-approved under strict standards.

For the physician: Please prescribe preferred products and allow generic substitutions when medically appropriate.

Brand-name drugs are listed in CAPITAL letters.

Generic drugs are listed in lower-case letters.
