

Guidance: Completing the Student Learning Assessment Report (SLAR)

| Element | Task | Not Completed | Completed |
|---|--|---------------|-----------|
| Assessment Plan. | Review your 2021-2024 Assessment Plan. Pay close attention to the Student Learning Outcomes, | | |
| Updated every three | Reporting Cycle, and Measures. | | |
| years. | Review the <u>Reporting Cycle</u> and <u>Measure/Outcomes</u> Guidance Sheet. | | |
| | Are you following your assessment plan as written? If not, why not? Does it need to be revised? If | | |
| | your plan needs revision contact cbende9@lsu.edu | | |
| Measure Activity | Follow your assessment plan. Ensure you are assessing and reporting on the outcome using the | | |
| Details (Implementing your Assessment Plan) | measure indicated in the plan in the correct reporting year. | | |
| | Consider your outcomes and determine (with faculty consensus) on what the minimum level of | | |
| | acceptable student performance is – the target. | | |
| | Review the <u>Target Setting</u> Guidance Sheet. | | |
| | Consider when the data will be collected (or when it was collected) - | | |
| | semester/course/sampling/population. | | |
| | Determine when program faculty will meet to review the data collected. | | |
| Results and | Results should be specific and disaggregated are usually presented in an excel file or a visual | | |
| Summary of Results | representation (charts and graphs) that is easily understood by an external reviewer. For example, | | |
| | if a rubric was used to assess the student work, break down the results by each achievement | | |
| | category and performance criterion. If a licensing or certification exam is used, the results are | | |
| | disaggregated. For example, the results are broken down by demographics, content areas, or | | |
| | sections. Pass rates should not be the only results provided. | | |
| | If you are uploading your data in a Word or Excel document, have you provided a summary of the | | |
| | data? Including the number of students, averages, etc. | | |

| Findings | Was your target "Met" or "Not Met"? | |
|-----------------|--|--|
| | Which people/committees/groups participated in the interpretation of the results? How were | |
| | these results communicated to faculty and/or stakeholders? | |
| | Please explain the results. Include things like: your program's level of satisfaction with the results | |
| | and an explanation of how the past/current curriculum/co-curriculum might have impacted the | |
| | results. | |
| | What are the limitations of this assessment research and/or findings? | |
| | Were multiple years of data used to help interpret the results? If so, are then any trends, | |
| | consistencies, or inconsistencies? If so, please report. | |
| | Reflect on your assessment process and results. Do you think these results are valid and/or reliable? | |
| | Are the results sufficient to make informed decisions to improve student learning? Why or why | |
| | not? Review the <u>Learning Improvement</u> Guidance Sheet. | |
| Actions | Provide a discussion of your intended improvement actions that focus specifically on student | |
| | learning. Explain why or how the improvement action is expected to positively affect the learning | |
| | outcome. | |
| | Review the <u>Actions Options</u> Guidance Sheet. | |
| | Discuss any causation or associated details identified in your assessment activities (e.g., | |
| | approximate dates of and person(s) responsible for implementation, and where in | |
| | curriculum/activities and department/program they will occur; how results and intended improvement actions will impact SLO). | |
| | If applicable, provide a discussion of any empirical or research-based evidence that supports your intended improvement actions. | |
| Analyze Outcome | Was the overall outcome "Met" or "Not Met"? Your program will need to decide the threshold for meeting the outcome. | |
| | <u> </u> | |
| | The program should prioritize the findings of direct measures over indirect measures. For | |
| | example, if a program utilizes 2 measures (one direct and one indirect) and the direct measure is | |
| | not met, it is likely that the overall outcome was not met regardless of the findings for the indirect measure. | |

If you have questions or need assistance in completing your SLAR, please contact Tara Rose (trose@lsu.edu) or Coral Bender (cbende9@lsu.edu).
