Motion/Simulator Sickness Screening Form

Motion sickness has many symptoms, but not all individuals experience the same symptoms. Common symptoms that may occur alone or in combination include: general discomfort, drowsiness, headache, sweating, nausea, blurred vision, dizziness, or faintness.

For your safety, we need to assess the risk that you might become ill in our experiment. Please consider the following questions that best characterizes your experience.

1. Do you experience motion sickness when flying in an airplane?
   Never   Seldom   Often   Always   Not applicable

2. Do you experience motion sickness on boats?
   Never   Seldom   Often   Always   Not applicable

3. Do you experience motion sickness trains?
   Never   Seldom   Often   Always   Not applicable

4. Do you experience motion sickness when riding in the back seat of cars?
   Never   Seldom   Often   Always   Not applicable

5. Do you experience motion sickness in a simulator?
   Never   Seldom   Often   Always   Not applicable

**Scoring Criteria:**

1. If answered **Never** to all questions, accept

   [Accept]  

2. If answered **Seldom** to one or more questions and exposure was significant (e.g., flew once, experienced motions sickness once), reject. If there are clear mitigating factors (e.g., turbulence was severe) participant may be accepted, but include rationale below:

   [Reject]  
   [Accept with explanation]
Motion/Simulator Sickness Screening Form

3. If answered **Often** one question, then reject, unless clear mitigating factors are present (e.g., flies several times a year and rarely experiences symptoms, and then only in the most severe turbulence). If the symptoms are severe, such as vomiting or prolonged symptoms, then reject. Note rationale below.

   - Reject [ ]
   - Accept with explanation [ ]

4. If answered **Often** in two or more questions, reject regardless of mitigating factors.

   Reject [ ]

   Rationale for exception to rule (where allowed):
