

Clicker Security Account & Password management

Clicker Security

Presented by:

Sumit Jain

Clicker Security

- Different modes
 - Mobile Applications
 - Physical Clickers
 - Web-based
- Concerns of academic dishonesty
- Currently, limited protection against mobile applications or web-based solutions.
- Different vendors provide/collect different information.
- Only a single solution (TurningPoint) supported by the University; however, multiple solutions utilized.

Account and Password Management

Presented by:

Sumit Jain

Upcoming changes

- Changes to credentials and authentication
 - A credential is a combination of a username and password and authentication is using credentials to access a system and/or an application
 - Multiple username and passwords exist today
 - Consolidation to a single username and password
 - Authenticate using a single credential

Credential Environment

Current Environment

Unique Set of Credentials

MyLSU

EDUROAM

VPN

Computer Log On

LSUMAIL

(Email, OneDrive,
Skype for Business)

Credential Environment

Post Roll-Out Environment

Unique Set of
Credentials

MyLSU

EDUROAM

Computer Log On
LSUMAIL (Email,
OneDrive, Skype
for Business, Box,
Teams)

Why the change?

- Various identity, account, and access management systems
- Legacy system dependency
- Complexity with changing IT environment
- Security enhancements
 - Multi-factor authentication
 - Conditional access
 - Secure messaging
 - Advanced threat protection
 - URL management

Dates of Roll Out

Migration Dates for all LSU Flagship Departments

Between October 10th and November 28th

After the Migration Process is complete for a department

- All users will only need to utilize a single set of credentials (username and password)
- Access to new services (Box.com and Microsoft Teams)

Roll Out – Impacts to You

- Account Synchronization
 - Re-authentication required for Office365 applications (E-mail, Skype for Business, OneDrive) on all devices utilizing myLSU credentials
- Box
 - Used like a network file share
 - Departmental secondary accounts to host files and folders to enable collaboration.
 - Supports collaboration with both internal (team/departmental/college/university) and external entities.
- Microsoft Teams
 - New University-Supported service for cloud collaborations
 - Features include persistent chats, channels, etc.
 - Resource for team-level collaboration

Roll Out – Impacts to You (cont.)

- Password Management
 - Be mindful of the password being utilized
 - Utilize complex passwords
 - Ensure Password Reset Questions are setup in myLSU

Resources

- Working with Departmental IT contacts (TSPs)
- E-mail communications (Broadcast messages, departmental campaigns through TSPs)
- myLSU portal
- GROK Articles
- Service Desk
 - 225-578-DESK (225-578-3375)
 - helpdesk@lsu.edu
