

Please Note: Fees are based on the number of masses or lesions biopsied. Each separate site will count as one (1) biopsy. Standard biopsy charge (HB001) for the first mass. HB002 is charged for 2-3 masses. Each additional mass beyond 3 will have an additional charge (HB007). For masses either between 2.5-10 cm (HB011), 10-20 cm (HB012), or >20 cm (HB013), an additional charge will apply.

Sometimes pathologists will request extra special staining procedures at their discretion to attempt a definitive diagnosis on biopsies. There will be additional charges for these stains, and they will be billed to the client. If a pathologist recommends immunohistochemistry (IHC) on a biopsy, the pathologist will indicate his/her recommendation within the comment section of the report. If the client agrees and approves additional testing, the client will need to contact the laboratory and indicate the desire to proceed with the additional testing. Additional charges for IHC will be billed to the client.
