**Test Description** | **Code** | **Fee**
---|---|---
**ELISA for Antigen Detection** 2,3,4
Equine Infectious Anemia (ELISA) | SV053 | $10.00

**Immunofluorescence Assays (IFA) for Antigen Detection** 2,3,4
Rabies Fluorescent Antibody (IFA) (additional fee for brain removal) | V016 | $70.00
Rabies brain collection - bats | V032 | $25.00
Rabies brain collection | NS040 | $25.00
Euthanasia for rabies testing | NS050 | $20.00

Miscellaneous test fees and supplies | V031 | Varies

1 All electron microscopy services to be completed at the University of Georgia EM facility (additional referral fee will be applied)

2 Direct Negative Stain accepts cell cultures, lysates, allantoic fluid, or viral pellet suspensions in which the sample is directly absorbed onto a grid with no extra preparation. A contrasting stain is applied and the grid is evaluated.

3 Complex Negative Stain accepts fecal samples and scabs or crusts from veterinary clinics and diagnostic laboratories. The preparation is two-fold: part of the sample is clarified quickly with the supernatant absorbed onto a grid; another part of the sample undergoes differential centrifugation before absorbing a concentrated pellet onto a grid. A contrasting stain is applied and both grids are evaluated.

4 IHC test may be available in LADDL as an alternative test (please check IHC fee schedule)

5 Molecular and Serology tests may be available in LADDL as an alternative assay (Please check the molecular diagnostics and serology fee schedules)

6 Please call the lab. Some tests will be performed at another AAVLD accredited veterinary diagnosis lab.

Current as of 07/01/2024. Fees are subject to change. Call 225-578-9777 for questions.
